800 At NFO Hamburg Sale

In just one hour and 20 minutes last Monday morning, National Farmers Organization members from Perry and Dauphin Counties sold at retail over 13,000 pounds of lean ground beef. When they opened the doors of their trailer, the NFO'ers were greeted by a crowd of hundreds, lined up to buy five-pound bags of hamburger for $5 apiece, just under 91-cents a pound. The first person in line was a 71-year-old lady to buy her package. Altogether, about 800 buyers showed up and left with single packages, arm loads, 50-lb. boxes or trunk loads.

Some 25 NFO members were on hand to help with distributing the meat, taking the money, and promoting the product. "You can't get meat like this in the stores," a man in an NFO cap shouted as he walked through the crowd. "Stock up while you can. We used everything - the steaks, the roasts - not just the trimmings. Get your 80-percent lean hamburger right here, folks. It's going fast."

On hand to record the sale were representatives from local papers and wire services, and local and network TV camermen. There was also a surprise visit from the Dauphin County Bureau of Health. The inspectors found nothing amiss with the sale A month earlier, at the Pennsylvania Farm Show the same NFO group had set

[Continued on Page 18]

Jim Brown, a Perry County beef farmer, was one of the peaceful NFO'ers on hand in Harrisburg Monday morning for a sale of NFO hamburger directly to consumers.

Some 800 customers showed up and carted away more than 13,000 pounds of lean hamburger in one hour and 20 minutes.

Hans Herr Chapter Celebrates First Nat'l. FFA Week

The observance of National FFA Week will take place this coming week (Feb. 15-22) and for the newly organized Hans Herr FFA chapter in Lancaster County, it will be the first occasion to mark the event.

The Hans Herr FFA Chapter, which was organized at the Willow Street Vo-Tech school in southern Lancaster County, was granted their charter during the state FFA Mid-winter convention held in Harrisburg during Farm Show Week.

Two advisors, James Kerr, horticulture instructor and Charles Patterson, floriculture instructor, head the organization which presently has a strong membership of 42 students enrolled in both areas of study.

To be chartered in the State and recognized at the National level, the chapter had to draw up a constitution and present a work program for the coming year.

"The students took an interest and did most of the

[Continued on Page 14]

Discussing plans for the coming year are officers of the newly chartered Hans Herr FFA chapter. Seated (from left) Kathy Moyer (sitting in for Kathy Hamm), news reporter, McCaskey; Dawn Hershey, treasurer, Pequea Valley; Diane Skethway, secretary, Pequea Valley; standing (from left) Chris Miller, president, Penn Manor; Keith Herr, sentinnel, Penn Manor and Sam Fonzi, chaplain, Penn Manor.

Chester DHIA Annual Meet

Chester County Dairy Herd Improvement Association members held their 16th Annual Meeting last Thursday evening at the Guthriesville Fire Hall. During the meeting, the members approved two amendments to their bylaws, elected three new directors for three-year terms on the board, and honored two of their number with production awards.

This year's top award for butterfat went to Jefferson D. Yoder, Elverson R1. Last year, Yoder's 53.3-cow herd of Registered Holsteins averaged 688 pounds of butterfat, while compiling an average record of 17,386 pounds of milk.

The high milk production award went to Earl M. Weir, Cochranville R2. Weir's 33.6 Registered Holsteins produced an average 17,684 pounds of milk, while producing 672 pounds of fat.

Chester County agent Robert Powers pointed out to the group that there were ten herds in the county this year averaging over 600 pounds of fat. Only seven herds topped

Gerald Keller

Young Hog Farmer Wins County Award

by: Melissa Piper
Associate Editor

For a young man just 16 years-of-age, Gerald Keller, Lititz R2, has taken on much responsibility as he has been in partnership with his brother raising market feeder pigs for sale. Gerald is the son of Mr. and Mrs. Lloyd Keller.

Gerald began his swine operation three years ago as a project for his freshman FFA class. For the next two years, Gerald raised market hogs to sell but as a junior, added a new dimension to his program by beginning a swine breeding operation.

Gerald now has 20 sows that he rotates in 4 groups for a breeding schedule. He raises the young pigs to 8 weeks of age and sells them as feeder animals usually to his father who then raises

SHEEP 663. Compared with 773 head last week, and 411 head a year ago. Wooled slaughter lambs steady to $1 lower. Choice 70-120 lbs. wooled slaughter lambs 38.00-43.50, Good 60-100 lbs. 29.00-40.00, few Utility 40-60 lbs. 25.00-30.00. Slaughter ewes 5.00-16.50.

Local Grain

Thursday, February 13

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, February 13, are:

	Bid+	*Offered+*
Ear Corn		
New	62.50	69.50
Old	—	—
Shelled Corn	2.99	3.24
Oats		
Local	1.60	1.88
Western	—	2.30
Barley	2.38	2.62
Wheat		
Feed	2.82	3.10
Millers	3.40	—

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

If you have fat cattle or need feeders . . .

Peoria Cattle

February 13, 1975

Weekly Summary; Cattle receipts this week 6200, compared to last week 5900, and to last year 4500.

Compared to last weeks close, Slaughter Steers 1.00-2.00 lower. Slaughter Heifers 2.00-3.00 lower. Cows 1.50-2.00 higher. Bulls steady. Receipts 75 pct. Slaughter Steers, 15 pct. Slaughter Heifers.

SLAUGHTER STEERS: Choice and Prime 1150-1300 lbs. yield grade 3-4 34.50-36.50, late 34.50-36.00. Couple loads early 37.00-37.50. Sixty head 1445 lbs. yield grade 4-5, 33.50 and load 1600 lbs. yield grade 5, 30.00. Choice 950-1250 lbs. yield grade 2-4, 33.50-36.25; at mid week 33.50-35.25. Mixed Good and Choice 900-1300 lbs. 31.00-33.50. Good 29.00-31.00. Standard and Good Holsteins 27.00-29.00; few Good 30.00.

SLAUGHTER HEIFERS: Choice and Prime 900-1075 lbs. yield grade 3-4, 33.50-34.50; several loads 35.00 Monday, and part load 36.00. Choice 850-1050 lbs. yield grade 2-4, 31.50-33.50. Mixed Good and Choice 750-1100 lbs. 29.00-31.50. Good 24.00-29.00. Standard and Good 22.00-24.00.

COWS: Utility and Commercial 17.00-20.00. High dressing Utility 20.50-21.00. Cutter 15.00-19.00. Canner 12.00-15.00.

BULLS: Yield grade 1-2, 1100-1600 lbs. 21.00-23.00.

Young Trees

Young trees produce more oxygen than they use. However, when they grow old and die, or when they are harvested, photosynthesis slows down or stops completely and another process begins. When lumber finally decays entirely, it will have absorbed all the oxygen it produced when it was a young growing tree.

Greencastle Livestock Auction

CATTLE 152. Compared with last Monday's market, slaughter cows $1 to $2 higher. One Choice slaughter steer at 33.25, few Good 30.25-31.75, couple Standard 27.00 and 29.25, couple Utility 22.00 and 25.00. One Standard slaughter heifer at 25.25. Utility & High Dressing Cutter slaughter cows 20.50-22.50, Cutters 19.00-20.25, Canners 17.50-19.10. Few Yield Grade No. 1 1300-1575 lbs. slaughter bulls 26.00-27.25. Good & Choice 450-600 lbs. feeder steers 24.00-29.00.

HOGS 73. Couple lots US No. 1-3 205-240 lbs. barrows & gilts 40.50-41.00, one lot No. 2-3 200 lbs. 40.00. Few us no. 1-3 400-530 lbs. sows 34.00-36.25. One Boar at 28.00.

FEEDER PIGS 5. One lot US No. 1-3 80 lbs. feeder pigs 23.00 per head.

SHEEP 0. No sales on offer.

Coveralls For All Ages

Once considered the workman's uniform, coveralls have become stylish for all ages. And they make practical playwear for children. You'll find coveralls in traditional denim, brightly colored corduroy and cotton-polyester blends, according to Extension specialists at The Pennsylvania State University. For infants, there is even a stretch coverall. Coveralls stand up to many washings and wearings and feature machine washability and easy-care features.

The Kitchen Almanac

Breakfast Broil-Ups: For a Monday morning wake-up, treat your active youngsters and busy husband to orange-broiled pears. Take halves of canned Bartlett pears and top each with fresh orange segments. Place them in a shallow baking dish and add ½ cup pear syrup. Top the filled pear halves with a brown sugar-butter-cinnamon mixture. Broil until bubbly. A great call to breakfast.

* * *

Stuffin' Stuff — Hollow out radishes and fill with a cheese spread . . . Stuff baked apples with nuts, dates and figs. Honey adds a nice touch, also . . . Fill pitted dates with nuts or cut-up marshmallows . . . Stuff celery with peanut butter and top with any of the following: peanuts, raisins, sour cream, jam or garlic salt.

Hollow out tomatoes and fill with tuna or other seafood salad — or — fill with ham, chicken or egg salad.

* * *

Try adding deviled ham to scrambled eggs.

* * *

Consumer Corner. The home trash compactor has been called the first new major appliance to come along in 30 years.

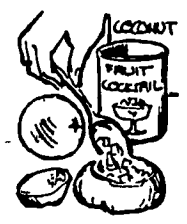
When this modern version of the "foot stomper" is used in combination with the automatic dishwasher and the food waste disposer, the three appliances provide homemakers with a 1-2-3 punch against kitchen cleanup chores.

Trash compactors developed by engineers for KitchenAid appliances provide an amazing 3,000 pounds of ram force and can reduce the volume of trash as much as 75%! That's "super crunch"!!

* * *

Buffet Onions: Include these tasty onions in sour cream in your next buffet menu. Thinly slice 1 large Sweet Spanish onion and 1 large cucumber. Separate onion slices into rings. Arrange in shallow serving dish and sprinkle with salt and freshly ground pepper. Combine 1 cup sour cream, 2 tablespoons lemon juice and 2 tablespoons vinegar. Pour over onion and cucumber. Serve chilled. Makes 6 servings.

* * *



Fruit Puffs: Fold drained canned fruit cocktail, toasted flaked coconut and a little grated orange rind into sweetened whipped cream. Spoon into baked cream puff shells and serve sprinkled with powdered sugar.

* * *

Editorial note: You may want to clip this feature and keep these worthwhile tips in your own "kitchen file" And, if you have any cooking hints you would like to share with the Almanac send them to Harry G. Clark, (512), 173 W. Madison St., Chicago, Ill. 60602.

Thought For Food

South African Rock Lobster With Mustard Sauce

Drop 2 packages (8 oz ea) South African rock lobster tails into boiling salted water When water reboils, cook tails for 2 to 3 minutes Drain immediately and drench with cold water, chill Remove meat in one piece from shell by cutting down both sides of underside membrane and removing it, inserting thumb between shell and meat, and pulling meat away from shell slowly Cut into bite size chunks replace in shell Combine ⅔ cup light cream, ⅔ cup vinegar, and 1 package instant vanilla pudding in mixing bowl Mix well, add ¼ teaspoon salt and 3 tablespoons prepared mustard, beat with egg beater about 1 minute or until well mixed Let stand about 5 minutes to set Just before serving, stir sauce until creamy Makes 1-¼ cups Serve filled South African rock lobster shells on appetizer or snack plates, with individual bowls of mustard sauce and Swedish crisp bread Yields 6 servings

Agriculture Needs Water

Agriculture is the nation's major consumer of water, says the U.S. Department of Agriculture. Of all the ground and surface water used in the United States, 86 percent is used by agriculture, mostly for irrigation.

Farmers Plant Trees

In one year farmers planted 398,000 acres of trees, constructed 22,000 miles of terraces, and raised the Nation's total of wildlife upland habitat to more than 39 million acres, reports the U.S. Department of Agriculture.

How HOW Effects You

Suppose you bought a new house, and after about a year found a big crack had developed in your basement floor.

What could you do about it?

Normally, you could complain to the builder. Maybe he would fix it, and then again, maybe he wouldn't. If the latter, your only real recourse would be a law suit, costly and time-consuming. Meanwhile, you'd probably have to pay someone to fix that crack.

Suupose you were the builder, and one of your home buyers brought this problem to you. You would have to decide whether or not you were obligated to fix that crack. If you fixed it, it would cost you money. If you didn't fix it, you might face a possible law suit, or at the least, a good battle with your client.

Until now, there has been no recourse for either party except the courthouse, and no real set of standards to pin down responsibility for the various housing problems that arise with new houses.

HOW, the new Home Owners Warranty program, is expected to change this and at the same time, give home builders a whole new improved image.

"It's the greatest thing that's happened for builders," according to local builder Don Kepner, who was instrumental in getting the program underway in Pennsylvania and this week became the first builder in Lititz to sign up for the program.

Basically, HOW is a master insurance plan that protects both builders and home buyers against defects in new houses.

For houses enrolled in HOW, all major systems are covered by the builder for the first two years. After that, for another eight years, insurance takes over to cover defects that may develop.

The program dictates certain basic standards of construction, and a local warranty council enforces them.

Basically, it's a method of policing ourselves, Kepner explained, a step that was necessary before the government jumped in and did the policing for us.

"It's something that has been long overdue to the industry," Kepner said. I think it's the greatest sales tool I've heard of. Most people don't know a lot about houses, they buy by price. People need confidence in a product, and a 10 year warranty should be a good incentive to buy."

Kepner predicted that within five years "there won't be a bank in Lancaster County that will give a mortgage on a home without this (HOW)."

Kepner will be signing up four of his houses this week with HOW. Another local building firm, Hurst Bros. Builders, is also scheduled to sign into the program.

Basically, this is how the program works.

A builder has the option of enrolling any of his new houses with HOW. During construction, three inspections are made by locally appointed experts - one to inspect footings before ground is broken, one to inspect houses after all installations are in, and a final one after a house is finished.

If the house is approved, the builder and the owner are each given a certificate of participation, a copy of a home warranty agreement backed by a master insurance policy.

Specified defects that occur during the first two years are covered by the builder himself. After that, the insurance takes over for

THE OLD FARMER'S ALMANAC

FEB. 17-23, 1975

Wrap up, cold snap.

Fill your ice house while you may . . . President Nixon arrived in China, Feb. 21, 1972 . . . First quarter of the moon Feb. 19 . . . Women first admitted to bar Feb. 20, 1879 . . . Average length of days for the week 10 hours, 47 minutes . . . Daylight Savings Time begins Feb. 23. Set clocks ahead one hour . . . It is said a modern house does well if it lasts as long as the mortgage on it.

Old Farmer's Riddle: What could you call a crying contest? (Answer below.)

Ask the Old Farmer: I know they spin wool to make yarn to darn holes in socks, but please tell me why they call it "spinning a yarn" when someone tells a tall tale? D. E., Huntington, West Va.

We figure you never saw much spinning done. The real sleight of spinning laid in the way that the spinner "stretched" the yarn. In fact, the whole process depended on it. Size, length, and twist. So, when old timers wanted to indicate that somebody was stretching the truth, they likened it to spinning a yarn.

Home Hints: Save the water in which potatoes are boiled and soak tarnished silverware in it for an hour. Wash and dry, and your silverware will be sparkling . . *Riddle answer:* A bawl game.

OLD FARMER'S WEATHER FORECASTS

New England: First part of week mostly cloudy and mild with light snow; end of week clearing and turning very cold.

Greater New York-New Jersey: Light snow to start, then clearing and cold; thaw and unseasonably warm by weekend.

Middle Atlantic Coastal: Becoming clear and not so cold by midweek, then cold again; end of week very cold and clear, then warming considerably.

Southeast Coastal-Piedmont: Clear and warm to start, then showers; end of week increasingly cloudy and very warm for season.

Florida: Clear with gradual warming up during the week.

Upstate & Western N.Y.-Toronto & Montreal: Week begins mild with flurries or light snow, then clearing and colder; end of week very cold.

Greater Ohio Valley: Clear and not so cold at first, then cold with flurries; sunny and warm with some rain latter part.

Deep South: Week begins fair and warm, then some showers in central; week ends mostly warm and cloudy.

Chicago & Southern Great Lakes: Clear and mild to start, then colder with some snow; latter part warm with heavy rain in west, light snow then clear and warm in east.

Northern Great Plains-Great Lakes: Early week seasonably cold with light snow in west; end of week warmer with scattered showers.

Central Great Plains: Clear and warm at first, then turning cold; clear and very warm latter part.

Texas-Oklahoma: Week begins fair and warm, then turning colder; end of week milder with light showers.

Rocky Mountain Region: Clear and mild in south to start, then cloudy and cold in north and central; end of week rainy in central with snow at higher elevations.

Southwest Desert: Week begins clear and warm in west and partly cloudy in east; end of week heavy rain in west and light rain in east.

Pacific Northwest: Cloudy and cool to start, then rain; rain continuing to end of week with some snow in monutains.

California: Early week cloudy and cool in south and rainy in north; heavy rain latter part in south with low-level flooding.

Rural America Conference Set

The Rural Housing Alliance and Rural America, Inc. recently issued a call for a four-day Conference on Rural America, April 14-17, at the Sheraton-Park Hotel, Washington, D.C. The Conference will deal with a whole range of problems which affect opportunity and the quality of life in rural America - defined to include the 60 million people who live outside the great metropolitan areas.

"The Conference will assess our present social and economic needs," Richard J. Margolis, RHA chairman noted, "against the historic shortcomings of both government and the private sector in dealing with rural people. Delegates will seek ways to assure rural Americans of their fair share of society's goods and services - health care and decent housing, jobs and educational chances, public transportation and public assistance - those benefits, in short, which taken together, go far to define the quality of a citizen's life.

"We hope the Conference participants will bring forth the broad outlines of a platform for rural Americans, including positions on such critical questions as access to land, credit, resources, energy and production. The focus will be on people - the right of rural people to determine what actions their governments take, the right of farmers to produce the food needed by society in an economical manner without being the first link in some corporate chain, the right of rural people to control and conserve the land and resources around them."

The two convenors of the Conference are joined by more than 35 sponsors, including farm organizations, labor unions, church groups, cooperatives, community action agencies, rural housing advocates, and consumer organizations. A partial list includes: National Farmers Union, National Rural Electric Cooperative Association, National Catholic Rural Life Conference, Industrial Union Department, AFL-CIO, Leadership Conference on Civil Rights, National Area Development Institute, United Presbyterian Church, National Rural Housing Coalition, and Citizens Against Rural Poverty.

Included on the program are Senators George McGovern, Richard Clark, James Abourezk and Edward Kennedy, Congressmen Mark Andrews, William Alexander, Parren Mitchell, and Andrew Young, James McHale, Pennsylvania Secretary of Agriculture, Arnold Miller, President, United Mine Workers, and more than 100 national and rural spokespeople covering 11 major topics. Scheduled for discussion are: Self-Government in Rural America; Rural Poverty; Land, Resources and People; Rural Health; Agricultural Production - Everybody's Business; Employment, Jobs and Training; Housing and Community Development; Energy and Rural People; Public Education in Rural America; Rural Economic Development; and Rural Public Transportation.

The National Advisory Council for the Conference includes more than 70 distinguished citizens, including 32 Senators and Members of Congress.

Registration fee for the Conference is $30 if mailed before March 21, after that date, $45. Fee includes cost of resource materials and copies of conference papers. Checks should be made payable to National Conference on Rural America, 1346 Conn. Ave., N.W., Washington, D.C. 20036.

The Rural Housing Alliance is a non-profit organization, headquartered in Washington, D.C. and formed to help low-income rural Americans obtain decent housing. RHA conducts research; publishes a newsletter, reports and handbooks; provides technical assistance to groups developing housing for migrant farmworkers, conducts workshops and administers a rural land development fund.

Rural American, Inc. is a Washington-based non-profit organization formed to encourage and carry out research, educational and technical assistance programs, and other activities designed to promote the economic and social welfare of people living in small towns and rural areas.

INCREASE YIELDS $15.00 AN ACRE FOR 25¢

ORTHO ISOTOX® Seed Treater [F] is backed by the best kind of proof a corn seed-treater could have: over one hundred million successful corn acres. All kinds of climate. All types of soil. All sorts of men doing the planting. Yield increases run up to fifteen dollars an acre — from a product that costs about 25 cents to treat a 20,000 plant-population-acre.

Feed Situation Outlook

Feed grain domestic disappearance in October-December 1974 was 46.3 million short tons and exports were 9.3 million tons, each 18 percent below a year earlier. Thus, disappearance has begun to decline in line with this year's smaller supply. Reductions will continue in order to stretch supplies until the 1975 crop harvests this summer and fall. Total feed grain supplies for 1974-75 were 188 millions tons, 21 percent smaller than last season. Domestic use for feeding is projected at 123 million tons, a fifth less than in 1973-74, and exports are projected at 34 million tons, down 24 percent.

Feed grain prices have declined from last autumn's highs due to the sharp reduction in domestic feed grain disappearance. Feed costs have been high in relation to market prices of livestock, poultry, and dairy products. Also, the possibility of record feed grain production in 1975 tends to hold prices down. Export demand continues at a strong pace. But as supplies are used up, substantial price fluctuations are possible.

Unfavorable feed cost-product price relationships have sharply reduced the number of cattle on feed over the past year - to 26 percent fewer on January 1 than a year earlier - and have forced hog producers to curtail production; as of December 1 they said they would have the smallest spring pig crop in 40 years. Because of relatively short time spans required to feed poultry and hogs to slaughter weights, October-December broiler and egg production were 8 percent and 3 percent, respectively, below a year ago, and pork production has recently begun to run below a year earlier. These reductions in production have not yet resulted in much price strength for the products, and feed cost-price relationships continue below those that have encouraged larger output of livestock and poultry in the past. In spite of the reduction in cattle feeding, beef production is running ahead of a year ago because of heavy slaughter of cattle off grass, and this is expected to continue throughout 1975. Recently, fed cattle prices have declined relatively more than corn prices.

October-December 1974 feed grain usage for food, industrial, and seed was slightly more than a year earlier. The volume used for these purposes is less sensitive to price changes than is feed usage and is expected to total about 18 million tons in 1974-75, about 3 percent more than in 1973-74.

On January 1, farmers had planted or expected to plant about 4½ million more acres to grains, soybeans, and upland cotton (combined) in 1975 than in 1974, and intended to shift some acres among the crops. The biggest shifts indicated (on a U.S. basis) were a reduction in upland cotton acreage of 4.4 million down to 9.5 million acres and an increase of 4.1 million in soybean acreage to 57.7 million. Intended corn acreage of 77.4 million was down 0.3 million from 1974, and oats acreage at 17.5 million was down 0.6 million. Intended sorghum acreage of 19.4 million was up 1.7 million and intended barley acreage of 9.8 million was up 0.7 million. If these plans are carried out, farmers would plant about 124 million acres to feed grains in 1975, only 1½ million more than in 1974.

Given average planting and growing conditions in 1975, the plantings in prospect would produce a record corn crop, and production of all feed grains could exceed 1974's 165 million tons by 25 to 40 percent. Feed grain prices may moderate enough to encourage expansion in feeding industries. But if poor weather strikes the crops again, small supplies and exceptionally high prices would continue to have serious reprecussions on U.S. livestock industries and on grain exports.

Letters to the Editor

NFO Backer Speaks Up

Editor: Upon reading your editorial concerning the wholesale slaughter of animals in the midwest, I was truly appalled to see that you have mistakenly placed the blame where it did not belong. It is true that some of the original calf kills were attended by NFO members, but not organized by NFO. The farmer has dug himself into his own hole, by being satisfied with whatever he was given when selling his product thru the local market or local coop. Finally, after years of this type of financial disaster for the American farmer the NFO comes along and gives them a chance to collectively bargain together for better prices.

What does the majority do? They turn their backs on what might be the only hope for them or the whole country. Agriculture is still the backbone of this great country, it's something we can't do without.

Now is the time for the American farmer to reach out to his fellow neighbor and join to collectively bargain for his products, whatever they are. There is no greater challenge ahead of us now the economic rehabilitation of this country, and the farmer has to meet that challenge head on, by placing true value on his products and bringing the consuming public back to the reality that we feed them.

I am a twenty six year old dairy farmer in New Jersey and have been amazed at the attitudes of those around me. They are completely convinced that nothing ever can be done to upgrade our markets, to a level of at least cost of production, plus a reasonable profit. The time has come for those dissatified with their markets to react, and take decisive action. "Action" is the key word. The NFO wants 30 percent of our American production to reach a price setting goal, but only action on every farmer's part will achieve this. If we don't accomplish these goals, we can look for continued decline in prices paid to farmers. As everything around us goes up in price, why should all of us be taking less? It is time for action now.

In closing I hope that you will print my response in your paper. It seems that you offer a very fine assortment of agricultural related articles, but in the future I would urge you to bring more reality, and express the true efforts of the National Farmers Organization. For they are showing the way in collective bargaining.

Donald K. Shinn
Columbus, N.J.

Questions 17c Hides

Either Gerald Charles, NFO publicity chairman, was wrong, or the sale of a cow-hide at 17-cents a pound was fixed, or the hide market varies about 10-cents a pound between here and Perry County.

On Saturday, February 8, 1975, we received our returns for the sale of 32 steer hides. We netted 5-cents per pound from Frys of Lancaster.

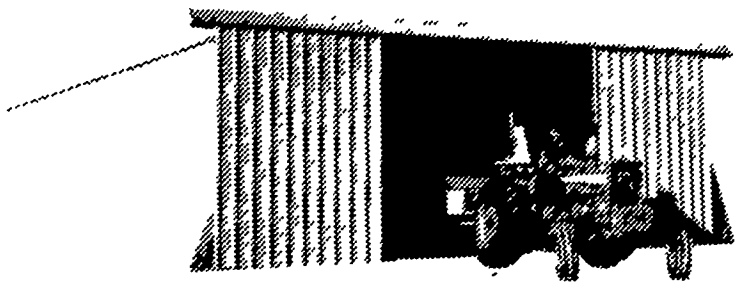
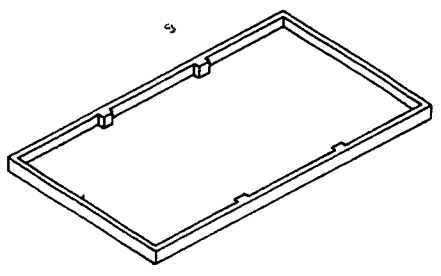
FREE CONCRETE



When You Buy Any Butler Farmsted® Building... For a Limited Time Only!



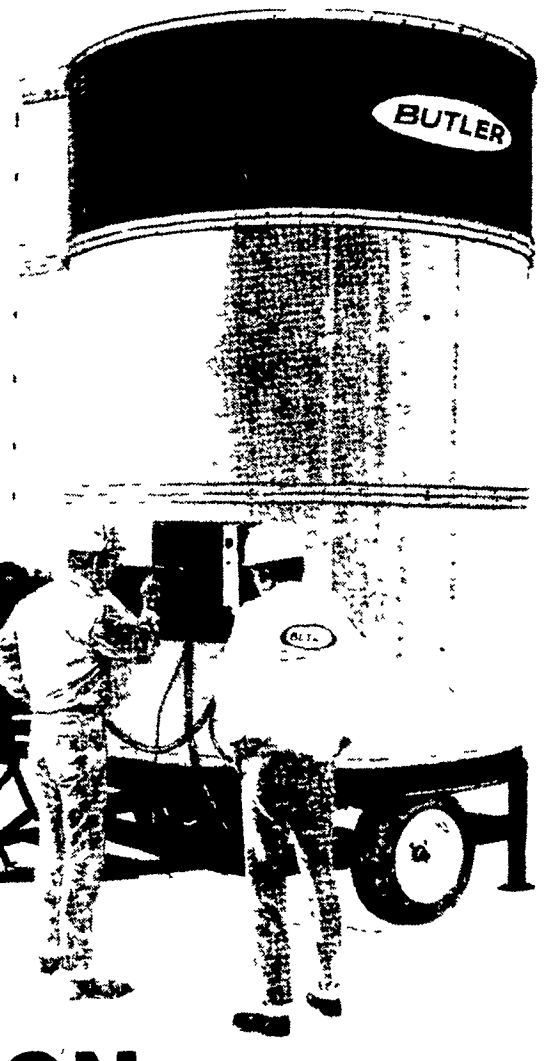
CURTAIN WALL

It's all yours. Free. Enough concrete for an 8" wide curtain wall foundation when you buy a Butler Farmsted® building. The amount of concrete furnished is limited to the amount specified in the Butler foundation drawings @ $26.75 per yard maximum If you elect to pour a complete concrete floor, you'll be credited the amount of concrete required for the curtain wall foundation.

All-Metal Farmsted is fire-resistant and termite-proof. Clear-span interior. No space-stealing rafters or trusses. Easily insulated. Complete accessories available. Offered in a variety of sizes Adaptable to almost any farm or ranch use.

Don't miss out on the free concrete. Offer expires midnight March 31, 1975

BUTLER KAN-SUN BATCH DRYER



The Kan-Sun Batch Dryer is especially designed for

- the farmer whose daily harvest rate is under 2 100 bushels
- the farmer who is drying grain for the first time and wants to make a minimum dryer investment
- the feeder who raises limited amounts of grain and doesn't want to haul his grain to town for drying and haul it back for feed
- the farmer with separate field and storage locations, the portable Kan-Sun Batch Dryer can be moved to the grain and to the storage
- the farmer who owns an in bin system such as Butler Stor N Dry® and wants to increase his daily drying rate, he will use the Kan Sun for drying, and the bins as cooling and storage tanks (dryeration)

The Butler Kan-Sun Batch Dryer can remove 10 points of moisture from 90 bushels of corn an hour In a 24 hour drying day the total dried and cooled will be 2 100 bushels Using dryeration can increase drying capacity to 2 700 bushels

Farm Commentary

by Dick Wanner

"Stealing" From The Farmer

Charles R. Ord, administrative secretary of the Pennsylvania Farmers' Association said at a Harrisburg press conference last Friday that consumers buying food at the local grocery store were actually "stealing from the farmer."

"Everybody likes to eat," he said, "but dislikes paying for the items necessary to fill their stomachs Keep in mind that many Americans have been trained to expect farmers to supply a plentiful supply of food at little or no cost to the consumer Farmers work for a profit - not just for the fun of producing food"

Ord went on to tell the largely urban group of newsmen present that there is absolutely no prospect of a decline in food prices in 1975 as long as inflation continues to push up the costs of marketing, processing, transportation, distribution even rising farm prices

"But," Ord pointed out, "of the 15 percent increase in consumer food prices in 1974 over 1973, the farmer got only three percent Most of the increase was caused by wider margins and costs after the food left the farm but before it arrived at the supermarket checkout counter

"It ought to be clear to anyone that the only way to bring food prices down is to control inflation Food prices do not cause inflation. Inflation causes higher food prices," Ord said

The PFA spokesman also touched on several changes the organization would like to see in the near future

PFA backs an economic formula for milk pricing, based on consumption, production cost, Class 2 sales and prices of butter, powder and cheese They want the Pennsylvania Milk Marketing Board to "get off its collective duff and start administering the state's milk marketing law." They also favor comprehensive land use planning that would build on the start made with the recent passage of the Clean and Green Bill, and they'd like to see the farmer's right to spread manure, plow, burn brush and other normal farming practices protected by law

PFA also backed a graduated income tax for Pennsylvania, and legal protection for farmer cooperatives and farmer profits

Producer-Consumer Coops

The Pennsylvania Department of Agriculture is investigating the mechanics of putting together a series of producer-consumer cooperatives, Secretary of Agriculture James McHale told Lancaster Farming on Thursday "The NFO hamburger sale held over here on Monday is one way to go directly to consumers," McHale said "We don't endorse any one farm group, but we will work with organizations like the NFO, Pennsylvania Farmers Association and the Grange to see if they're willing to help us in this effort.

"We want to bring farmers and consumers closer together We want to find out how much we can save by eliminating the middle man, and then we want to find out where all the middle man profits have been going all these years"

McHale said the project right now is in the research phase, but some contacts have been made with consumer buying clubs in various parts of the state

Why Not Buy The Birds?

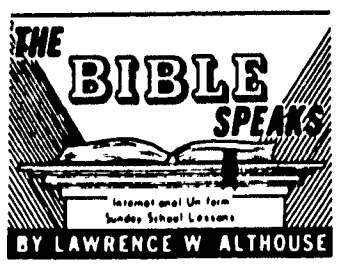
Poultry industry officials are concerned - rightly so, it seems to us - about a shipment of exotic birds being held in quarantine by the USDA in Miami, Fla USDA officials slapped the birds into quarantine when a test revealed that one of the birds exhibited symptoms of VVND, or exotic Newcastle disease The importer who brought the birds to this country, though, took USDA to court, and the court subsequently said the birds had to be released so that the importer could ship them to retail outlets throughout the country

And it looks like that's what will happen, because the USDA can't duplicate the results of its earlier VVND check That means, the judge has reasoned, that the birds are no longer infected Poultry industry officials have pointed out that not much is known about VVND in wild birds They could be in dormant carrier stage, and if the disease flares up, it could decimate the U S poultry industry

The economic consequences of a VVND outbreak are grim to contemplate, and we can't blame the poultry industry leaders for their concern The wheels of justice grind exceeding fine, sometimes ridiculously so, and legal decisions often go against what may appear to be common sense

Sometimes there's nothing one can do about legal decisions Judges put killers on the street, they put first offenders in jail with hardened criminals And now a judge in Miami threatens to loose a bombshell on the American poultry industry

The thought occurred to us, though, that the industry has a perfectly legal and sensible recourse That is to buy the birds and have them all destroyed That might be an expense course of action It might even be a bad precedent for future incidents of a like nature But it certainly seems much less expensive than standing by and watching whole flocks destroyed by disease



THE NEW CREATION

Lesson for February 16, 1975

Background Scripture: 2 Corinthians 5:16-21; Galatians 3:27-29; 6:1-7; Ephesians 2:13-16; Philemon.

Devotional Reading: Micah 4:1-7.

What is the mark of true Christianity?

For some people the answer to that question is to be found in subscribing to the right doctrines or creeds, conforming to the right rituals of worship or Christian initiation, or belonging to the right church.

Jesus, however, never seemed much impressed with any of these criteria. He was much more interested in results: " . . . you will know them by their fruits" (Matthew 7:20). The true follower of Christ will not have to tell you that he is a disciple, for his life will show it. This is what Paul meant when he said to the Corinthians: ". . . if anyone is in Christ, he is a new creation; the old has passed away, the new has come" (2 Corinthians 5:17).

A "Human Point Of View"

One test of this "new creation" is the manner in which we regard other people. Paul says: "From now on, therefore, we regard no one from a human point of view . . ." (2 Cor. 5:16).

If we are really disciples of Jesus, we will no longer regard our fellowmen with the "human point of view." But what is that point of view? It is an attitude that erects barriers between people, dividing the community and the world into races, classes, and creeds. It is a point of view that regards our fellowmen as "enemies" and "outsiders." In short, it is the attitude of estrangement and brokenness.

Yet, says Paul, that is not the way Christ looks at God's world. Where there are barriers, he tears them down. Where there is brokenness, he heals it. Where there are divisions, he brings harmony. As Christ views the world, "there is neither Jew nor Greek, there is neither slave nor free, there is neither male nor female; for you are all in one in Christ Jesus" (Galatians 3:28).

Ambassadors For Christ"

The fruit of Christ's ministry in our world, then, is never division, but reconciliation "God . through Christ reconciled us to himself" (2 Cor. 5:17). And lest we assume that it was intended to be a rather limited reconcilation, Paul includes the whole world. ". . . in Christ God was reconciling the world to himself" (5:18).

Oddly enough, however, one would often get the impression that the end result of "true Christianity" is anything but reconcilation. It often seems that the fruits of much "christian discipleship" are division, enmity, alienation, and even violence. (The current warfare between Protestants and Roman Catholics in Northern Ireland is only one of many historic examples.)

The trouble often is that Christians grasp only the first half of the "reconciliation" offered by God We gladly accept his offer of reconciliation with himself, but there is more: "God reconciled us to himself and gave us the ministry of reconciliation" and ". the message of reconciliation" If we would accept reconciliation to God, we must also give reconciliation to others.

The test of whether we really are the "new creation," turns on whether we have given up the old human point of view and become reconciling ambassadors for Christ.

NOW IS THE TIME...

Max Smith
County Agr. Agent
Telephone 394-6851

To Prepare For Pesticide Certification

All farmer sprayers and custom sprayers should be trying to gain maximum knowledge about the different spray materials and pesticides so that the procedure of becoming certified and licensed will be easier. At this point we are not sure of the exact training programs that will be offered in Pennsylvania, but in the near future opportunities for training will be promoted by our Extension Service. We will not be in the position to give tests and do the certifying, but hope to be able to prepare sprayers for this requirement.

To Be Careful When Buying

Many diseases and infections of herds and flocks are brought to the farm along with new animals. That's the reason that our Dr. Sam Guss at Penn State stresses the importance of buying from clean herds and then keeping the animals segregated for 30 days, followed by tests or examinations to be sure they are clean and free of any infection. It is feared that too many dairymen may be bringing Brucellosis into their herds by not following this practice. Verbal statements relating to the health of an animal should not be adequate assurance of a clean bill of health. Insist on health papers from the proper sources.

To Use Antibiotics With Caution

Many successful dairymen use various antibiotics with satisfying results. However, it is important to recognize the possible danger in the mis-use of these materials. In the first place, the user should read the directions on the label and follow them accurately. The withdrawal times are very important in order to have a quality product. Records should be kept as to the material used and the date. All milking helpers should be informed of the cows that are treated. Improper use of these antibiotics could mean the loss of a milk market.

To Follow Feeder Market

Very few cattle feeders are optimistic about making a great profit on their feeding operations at this time. However, it appears that the price of replacement calves or cattle is quite low as compared to recent months and years. One of our Extension Economists has suggested that now might be the time to invest in cattle, if any space is available. Also, if corn or other feed grains are on hand, the marketing of these grains through these cheaper cattle might be as good or better than trying to sell the grain on a "down" market With $4 corn it was almost impossible to realize any return. With corn at lower values, the chance of profit appears to be better. Healthy cattle and well managed are still essential.

Farm Calendar

Monday, February 17

7:30 p.m. Swine producers meeting, Lancaster Farm and Home Center.

7:30 p.m. Twin Valley Adult Farmer program on tractor and baler maintainance, vo-ag shop, Twin Valley H.S.

Pa.-Md. Roadside Marketing meeting, Sheration Inn, Gettysburg. Continues through Feb. 18

Tuesday, February 18

7:30 p.m. Goat meeting, Lancaster Farm and Home Center. For anyone interested in goats.

7:30 p.m. Manheim Young Farmers, hog management meeting number 3.

7:45 p.m. Ephrata Area Young Farmers monthly meeting, Ephrata H.S. ag dept.

Wednesday, February 19

10:00 a.m. Chester Co. Crops Day, Stone Barn, Unionville. Last day for reservations is Feb. 17.

6:00 p.m. Maryland ag safety and health conference, Chesapeake Room, Ag Ed Building, University of Maryland.

Thursday, February 20

10.00 a.m. Chester Co. Dairy Day, Stone Barn, Unionville, last day for reservations is Feb. 17.

Noon Inter-State Milk Coop, annual meeting, Hostetter's Banquet Hall, Mt. Joy.

7:00 p.m. Atlantic Breeders Coop, annual meeting, Blue Ball Fire Hall.

7:30 p.m. Manheim Young Farmers Hog Management meeting number 4.

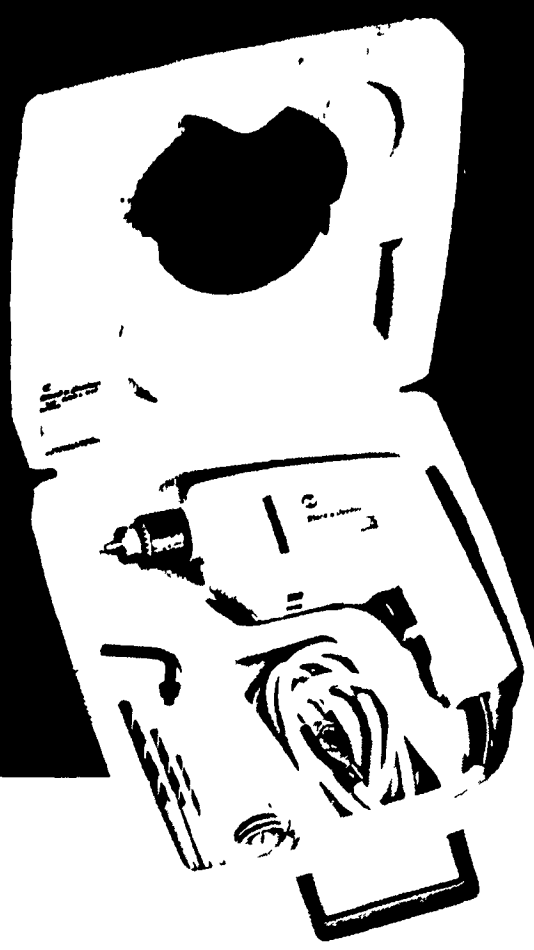
7 30 p.m. Poultry education meeting, Lancaster Farm and Home Center.

Friday, February 21

7:00 p.m. - Pa. Egg Marketing Assoc., monthly meeting, Sheraton-Conestoga, Rt. 222 near Lancaster.

Saturday, February 22

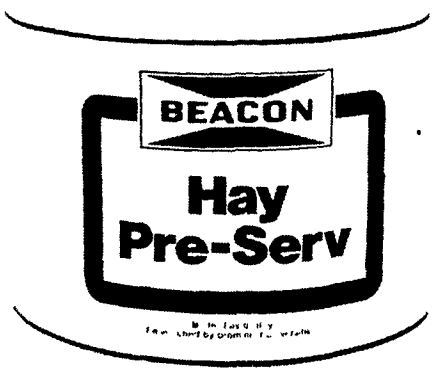
9:00 - 3:15 Schuylkill Co. Livestock Management day.



Get This Handy *Black & Decker*® Quarter-Inch Drill Kit . . . FREE!

Order 500 lbs. or more of Beacon Pre-Serv Materials, during February, and the Drill Kit will be presented to you on delivery.

(OFFER EXPIRES FEBRUARY 28, 1975)



Beacon Hay Pre-Serv*

Lets you cut and store hay earlier
Lessens risk of weather damage
Prevents mold and spoilage, oxidation, and excessive heating
Retains more of the feeding value

Beacon Silage Pre-Serv*

Preserves even with moisture levels from 40 to 65%
Locks in fresh cut feeding value and palatability of grass silage or haylage
Controls shrink, stink, and waste

Campus Preview Day at Lancaster Bible College

Lancaster Bible College will hold its semiannual Campus Preview Day on Monday, Feb. 17, from 9 a.m. to 3:30 p.m.

This open house on the campus is for high school students and post-high school students who are interested in a Bible college education.

Registration for the day will be held in Miller Hall at 9 a.m. (a registration fee of $1.50 is charged for those attending).

The activities of the day begin with a musical presentation by the CONESTOGANS and several of the other musical groups, a skit by the drama club, and then an address by Dr. Stuart E. Lease, President of the College.

Opportunity will then be given for the guests to visit some classes and see for themselves the atmosphere of learning that exists between the very capable professors and the student body at Lancaster.

Following the noon meal, a conducted tour of the campus is planned to give an overall view of the facilities. The climax of the day will be a time for questioning administrators, faculty, and student representatives about the various aspects of college life.

Individuals who are interested in attending should contact the College to register for the day. Phone (717) 569-7071.

Craftsmen Directory to Be Compiled

A directory of Pennsylvania Craftsmen will be published by the Pennsylvania Department of Commerce in cooperation with the State Guild of Craftsmen and the Pennsylvania Council on the Arts.

The Department of Commerce has begun work on this directory by contacting Crafts Guilds and organizations within the Commonwealth and requesting a list of their members. Next they will survey each craftsman operating within the Commonwealth to determine his or her specific craft, workshop address, and other related data.

Individuals will not be included in the directory without their consent. Craftsmen who are not members of a guild or organization may also be considered for listing in the directory.

Any Pennsylvania craftsmen interested in obtaining more information about the Directory of Pennsylvania Craftsmen should contact. Ms. Barbara Bass, Bureau of Statistics, Research and Planning, Pennsylvania Department of Commerce, B-14A Finance Building, Harrisburg, PA 17120.

Lancaster Co. Goat Meetings

A meeting for goat raisers and those who'd like to raise goats will be held on Tuesday, Feb. 18, beginning at 7:30 p.m. at the Lancaster Farm and Home Center.

According to N. Alan Bair, the associate county agent who arranged the meeting, there's a lot of local interest in rearing goats. The meeting will bring together the people who already keep goats as well as those who'd like to. Bair hopes that the meeting will lead to an exchange of information and ideas that will help everyone interested in the subject, and he hopes to make some definite plans for organizing a 4-H goat club.

A month from now, on Monday, March 17, Dr. Sam Guss, Penn State's extension veterinarian, well-known for his knowledge of and interest in goats, will visit the Farm and Home Center to talk about goats.

CUCUMBER FARMERS

WANTED

TO GROW CUCUMBERS AND OTHER FARM PRODUCTS.

We will have a mass meeting of all interested farmers in early March.

If you are interested in contract growing cucumbers, and-or tomatoes, and-or several varieties of peppers, Please write to.

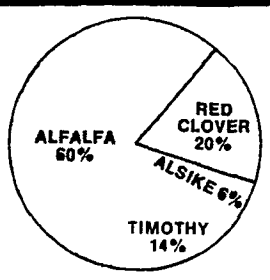
Dependable hay formula for less than perfect conditions

HOFFMAN ALL 'ROUND FORMULA

balanced blending of selected varieties for better yields



Because of its ability to fit a wide range of soil conditions, Hoffman All 'Round Formula has risen rapidly in popularity. It's especially useful where drainage in the same field may range all the way from good to poor.

Where chances of alfalfa success are pretty much of a borderline proposition, or where you expect variable performances in different sections of the same field — All 'Round Formula can be the answer. The combination of varieties used offers more disease resistance, hardiness and persistent yieldability. No common alfalfas are included, and there are several types of timothy. Excellent for hay, grass silage or pasture.

Hoffman All 'Round Formula is only one of 14 outstanding blends — each designed to produce bigger crops of better forage. Each is formulated to enable you to meet your type of soil and your management. See your Hoffman Seed Man

AVCO NEW IDEA 75 YEARS SERVICE TO AGRICULTURE

Schuylkill Co. To Sponsor Livestock Day

Beef, swine or sheep producers will have a chance of learning more about their enterprises as a result of a Livestock Management Day program planned for Saturday, February 21, 1975 starting at 9:00 a.m. at the Penn State Schuylkill Campus, Route 61 North, Schuylkill Haven. The program will be held in the administration building and will run from 9:00 a.m. to 3:15 p.m. covering such things as livestock management procedures, livestock marketing, management of pastures, forage production, farm livestock loans, and many other items helpful in developing profitable livestock enterprises.

This program is being sponsored by the Schuylkill County Cooperative Extension Service and will include Dr. Lester Burdette, Penn State Extension Animal Scientist, who will discuss Beef Management Practices, Mr. Dwight Younkin, Extension Animal Scientist, Penn State, covering Swine Management and The Pennsylvania Meat Animal Evaluation Center. David Kantner, Schuylkill County Extension Agent will discuss Sheep Management Practices and coordinate the program. Harold Brecht, Assistant Schuylkill County Agent will discuss Pasture Management and Forage Crop Production. Mr. William Steiner, District Soil Conservationist, Mr. Ben Godshall, Agricultural Stabilization and Conservation Service, Mr. Eugene Richard, Farm Credit and Mr. Armine Wodehouse, Farmers Home Administration will discuss Services Available from their respective agencies.

If profitable livestock enterprises is your objective, you might want to attend Livestock Management Day, Saturday, February 22, starting at 9:00 a.m. in the Auditorium of the Penn State Schuylkill Campus, Route 61, Schuylkill Haven. Additional details can be obtained by contacting David L. Kantner at the Schuylkill County Cooperative Extension Office, Post Office Box 404, Schuylkill Haven, Pa. 17972. Phone: 385-3431.

USDA Proposes New Ruling

The U.S. Department of Agriculture (USDA) recently proposed changes in regulations on paying indemnity to owners of cattle destroyed because of tuberculosis.

The new rules would allow payment of indemnities for unregistered bulls and steers destroyed because of reaction to tuberculin tests. The rate would depend on the appraised value of the animal, but would not exceed $350. Officials of USDA's Animal and Plant Health Inspection Service (APHIS) said these classes of animals were omitted when indemnity rates for cattle tuberculosis were increased in June 1972.

APHIS officials said the proposed revision would also provide that:

- Indemnities could be paid for exposed cattle sold from herds which are later destroyed because of tuberculosis, and for calves exposed to nursing cows which react to a tuberculin test.

- An independent appraiser could be used, at the discretion of the APHIS veterinarian - in - charge, when processing a claim for indemnity involving a large number of animals.

- USDA would pay half the cost of destroying cattle which were disposed of by means other than regular slaughter, including half the cost of transporting the animals to the point of disposal.

- An extension of the 15-day periods now allowed for destroying affected cattle, anc cleaning and disinfecting contaminated premises would be limited to an additional 15 days, thus setting maximum periods of 30 days for each task. Presently, there are no set limits for the extension periods.

- Claims would not be allowed for cattle found to be affected with tuberculosis that have been added to a herd under quarantine for the disease.

The proposal is scheduled to be published in the Federal Register on Feb. 7. Interested persons will have until March 12 to file written statements, views or comments. These should be sent to the Deputy Administrator, Veterinary Services, APHIS, USDA, Federal Building, 6505 Belcrest Rd., Hyattsville, Md. 20782.

All written comments received will be available at the Hyattsville office, Room 870, for public inspection during regular working hours.

NEW FORD MOLD BOARD PLOW

Fast, simple, durable. New 3 to 5-bottom mounted models and 4 to 8-bottom semi-mounted. A choice of 14, 16 or 18-in. bottoms. Optional high pivot beams with automatic reset minimize stone damage, save you time in the field. High-speed bottoms plow at 6 mph. New Heavy-duty 2-way plows with 2, 3 and 4-bottoms also.

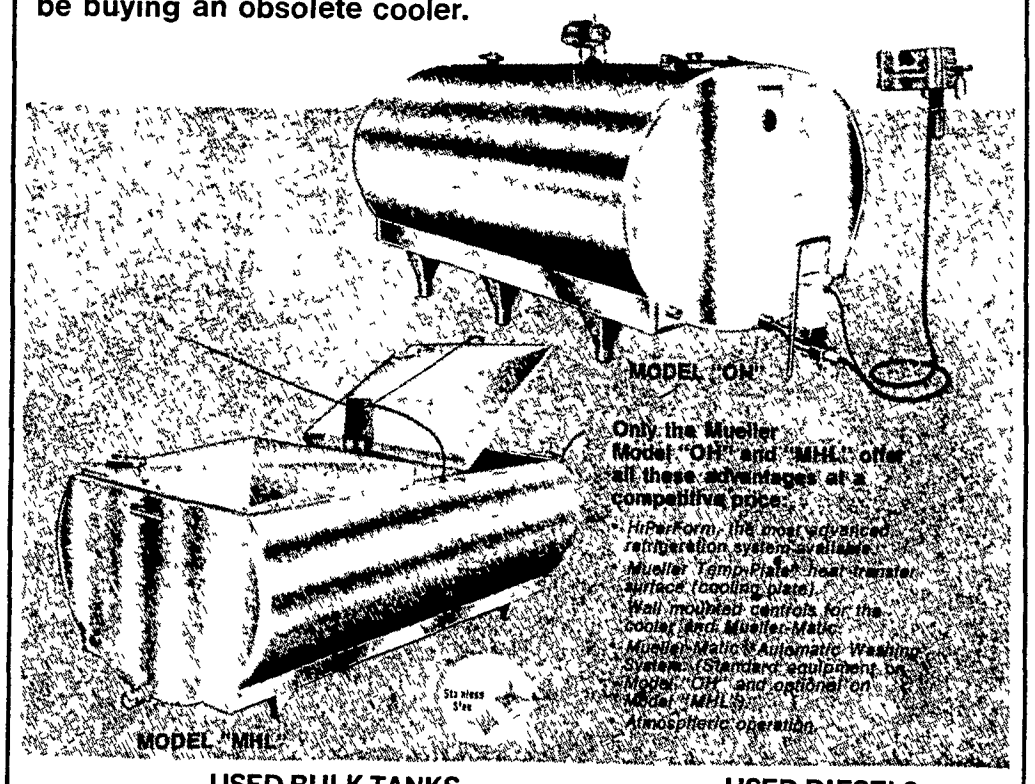
MUELLER MILK COOLERS
THE TOP PERFORMERS

The Mueller Models "OH" and "MHL" with HiPerForm make all other bulk milk coolers obsolete.

If you are in the market for a bulk milk cooler and you don't check all the advantages of the Mueller Models "OH" and "MHL," you may be buying an obsolete cooler.



Only the Mueller Model "OH" and "MHL" offer all these advantages at a competitive price:
- HiPerForm, the most advanced refrigeration system available.
- Mueller Simplate heat transfer surface (cooling plate).
- Wall mounted controls for the cooler and Mueller-Matic.
- Mueller-Matic® Automatic Washing System. (Standard equipment on Model "OH" and optional on Model "MHL").
- Atmospheric operation.

Hans Herr Chapter

[Continued from Page 1]

work in drawing up the constitution," Kerr explained.

"Since that time they have gone ahead with many projects also."

The Chapter has been involved in many activities both for themselves and for community service. At Christmas time the members visited a nursing home delivering homemade cookies to the patients and have also been preparing ground for inflation gardens.

The members of the Hans Herr Chapter have also sold citrus fruit and in the spring will be selling bedding plants to the public.

Along with their work, the organization has participated in field trips and have sponsored picnics and athletic events.

Many of the members are currently involved in building green houses at the school site and landscaping the area around the vo-tech facility.

Being vo-tech students, many of the young people are on co-op work programs which enables them to work either during the morning or afternoon at establishments in their field of study.

Currently 5 members of the chapter hold their Red Rose FFA degree. Vo-tech students in FFA have somewhat of a difficulty obtaining the county degree however, since their program is actually for only two years. Therefore in their second year they must obtain their chapter degree as well as their county degree.

Hans Herr FFA is the 12th group to be issued a charter in Lancaster County, with the name coming from one of the first prominent settlers of the Lancaster area.

The Chapter is the second to be organized by James Kerr, as he also sparked the initiation of an FFA group at the Brownstown Vo-tech school were he also teaches horticulture.

Steele Appointed

Harold R. Steele, 48, has been appointed District Sales Coordinator for American Breeders Service, a division of W. R. Grace & Co., according to an announcement by Harvey E. Rowbotham, General Sales Manager. Steele will join with Howard Loomis, District Sales Manager, in developing the A.I. potential in western Pennsylvania, Maryland and part of New York State for the Wisconsin-based organization.

A native of Martinsburg, Pennsylvania, Steele brings to ABS a lifetime of experience in the dairy industry. He served as an ABS Genetic Engineer for the past 17 years, as well as having his own dairy farm near Roaring Spring, Pennsylvania, for the past 21 years. Active in Holstein breed affairs, Steele has served on the Pennsylvania State Holstein Membership Committee for three years. He is past president of the Blair County Holstein Club and is presently a member of the Morrison's Cove Dairy Show, Inc.

Steele and his wife, Margaret, have two children - Russell, a dairy farmer; and Sherry, studying for her Masters degree at Pitt, majoring in Genetics. Steele and his wife will reside at Martinsburg, Pennsylvania 16662.

Mr. and Mrs. Gerald Erb

A Farming Couple Discuss the Economy

by: Melissa Piper

Like many other young farmers, Gerald Erb of Mt. Joy R1, has been concerned with the state of the economy and what effect it will have on the farmers as well as the average consumer. Although he has his own convictions, Erb never voiced his opinion until last week when he invited this reporter to his dairy farm where he and his wife Judy expressed how they as a young farming couple view the problem of the economy and its effect on their lives.

Gerald Erb, purchased his first dairy animals at the age of 14 with money he had earned selling asparagus door to door for his family. Following his graduation from high school, Erb bought a farm that belonged to his parents and went into the dairy business hoping it would be successful enough to support his wife and later his children also.

For Mr. and Mrs. Gerald Erb, Mt. Joy RD1, adding up the bills hasn't been an easy job but one that requires attention if their dairy operation is to continue efficiently.

Since that time, Erb has seen many changes in the economy and discussed the problems in a definite manner.

"I feel, man's greed is the cause of world wide inflation. Man has only himself to fear. Love thy neighbor as thyself has been one of our failures as a Christian nation."

One specific incident that bothered Erb was the Administration's act of exporting grain in 1973.

"In 1973 the American dollar fell to an all time low on the world market so the administration exported grain at a world record in order to improve the balance of payment and inflate the dollar," he commented.

"In return, the poor of this country paid the bill of payment by higher food costs."

Erb went on to explain what inflation means to the farmer.

"Inflation for the farmer is fuel that has doubled, interest rates going from 7½ percent to 10¾ percent, utilities and seed that has doubled, fertilizer that has tripled and baler twine that has gone from $7.-$34. in just one season."

"When profits that would normally be put back in as operating capital cannot be had, the farmer must cut costs and when you cut costs, production is cut, bringing higher prices to the consumer."

The Erbs feel that most consumers just don't really understand the economic turmoil present and future of agriculture.

"Most consumers blame the farmer's for the high cost of food but do not realize that the middlemen often drive up costs as well as the consumer wants."

Mrs. Erb stated her point of view concerning consumer demands by explaining where some of the cost problems ly hidden.

"Before consumers complain about the cost of food, they should take a look at what they are buying."

"Many people prefer to spend most of their time out of the kitchen and thus buy specially pepared food that takes short time periods to fix."

"These special foods, like frozen dinners do cost more, not for the food but the convenience."

The Erbs feel it would be more logical for consumers to buy directly from the farmer and avoid the cost of the middlemen and wholesalers.

"Consumers would find costs less if they bought directly from the farmer, such as butchered beef and vegetables."

"If more consumers bought in this manner, the supermarkets and the wholesalers would have to keep their prices competitive."

Although the idea seems like a good and intelligent step against high food prices, the Erbs agreed that most consumers still want conveniences.

What can be done to change their attitudes? The Erbs feel that people will soon have to begin reevaluating the important things in life.

"Food will soon have to come before two cars and luxuries."

"Most farm families can't afford luxuries urban dwellers seem to have, yet they have gotten along before and will continue to."

Running their dairy operation as efficiently as possible for profit returns, has been the goal of the Erb's although it has not always been as helpful as it could be.

Like many other dairy farmers, Erb was caught up in the dilemna of assessment when the Le-Hi co-op, where he was selling his milk, collapsed, leaving him with a deficit in profits.

And although he is now guaranteed $7.80 per hundredweight for his Order 4 milk products, Erb still makes just enough with his dairy herd.

"I couldn't live on just my milk check," Erb admitted, and has recently begun other enterprises to supplement the dairy operation.

Selling butchered beef, grain and firewood has helped although Erb still believes given the right conditions and help he could make money from just the dairy enterprise.

Why then has Gerald Erb and many other young farmers continued their work on the land? Erb described it in this manner.

"I like farming, it has been a way of life in my family for many generations."

"It makes you feel something to know that your family has been tied to the land making it work to support you and your family."

"Maybe I'm not making financial gains on paper by dairy farming, but I have something that few others could ever appreciate."

Erb added that he feels a need to produce as much on his land as he can so that others might benefit from it.

'We should be willing," Erb explained "to put our talents to work rather than under a bushel."

Chester DHIA

Earl Weir, left, and Jefferson Yoder were honored with production awards at last Thursday night's annual meeting of the Chester County Dairy Herd Improvement Association. Yoder's herd averaged 688 pounds of fat, while Weir's cows produced an average 17,684 pounds of milk.

(Continued from Page 1)

the 600-pound mark in the previous year.

The DHIA annual summary showed an average of 10,192 cows in the county between October 1, 1973 and September 30, 1974. They averaged 12,747 pounds of milk at 3.9 percent fat, for an average fat production of 496 pounds per cow. Total value of the product produced by Chester County cows in that period was $1159. The cost of the grain to feed the cows averaged $249, hay was $58, other forage added, $146, and pasture costs were an additional $12 for a total feed cost of $465. The value of the product above feed cost was therefore $694.

The bylaws amendments were made so that the association could have both a secretary and a treasurer. The offices had previously been combined, with the duties handled by Paul and Dorothy King. The Kings, however, informed the board that they no longer wanted the job. Mrs. June Hevner, an extension office employee, was named to take over the treasurer's duties. In accepting the position, Mrs. Hevner complimented the Kings on an excellent job of bookkeeping.

The newly elected directors, all of whom were named to a three-year term, were Joel Brown, Oxford R1, Paul H. Eby, Cochranville, and Harold J. Ranck, Cochranville R2.

CLEAN TOASTER

Shaking an electric toaster to remove crumbs may damage the small heating wires. A better way is to simply clean the crumb tray with a sudsy sponge. Always be sure the toaster is disconnected before cleaning. After washing the outside surface, follow by polishing with a clean dry cloth

Mount Joy Cooperative Elections

Roy Alger, Palmyra, was elected president of the Mount Joy Farmers Cooperative at that group's annual meeting recently at Hostetter's Banquet Hall in Mount Joy. Other officers elected were: Lewis Bixler, Marietta R1, vice-president; James Eshelman, Mount Joy R2, secretary; Albert Fry, Manheim R2, assistant secretary; Henry Garber, Elizabethtown R1, treasurer; and Preston Newcomer, Mount Joy R1, assistant treasurer.

During the meeting, the coop members set the date for next year's annual meeting for January 22, 1976, at Hostetters.

Will your feed efficiency measure up to Mol-Mix?

To any cattleman, whether he's a feedlot operator or a cow-calf man, feed efficiency is the name of the game.

But mere supplementation may not be the whole answer. If you choose an inferior brand, you may just be wasting your money.

Mol-Mix liquid feed supplement contains extra "performance oriented" ingredients that many others don't have. Things like: phosphoric acid, ammonium polyphosphate, corn distillers solubles, and condensed fermented corn extractives. A feed supplement, as with any manufactured product, is no better than the quality of its construction. You get what you pay for. Mol-Mix is made with the best ingredients available.

It's just an out and out fact that Mol-Mix will make more net profits for you. Some have reported as much as $5.00 return for every dollar invested in Mol-Mix.

Stop in at your Mol-Mix dealer and find out how. He may just have a nice surprise for you.

QUALITY INGREDIENTS MAKE A QUALITY PRODUCT.

NFO Sale

(Continued from Page 1)

up a cheese sale, but ran afoul of the Pennsylvania Department of Agriculture's Bureau of Weights and Measures when some of the packages were found to be underweight.

The Thursday after the sale, Gerald Charles, a Perry County dairy farmer who is NFO publicity chairman for the area, told Lancaster Farming that they had learned a lot in the two sales held so far, and they were working on another sale in the near future. "At our next sale, we'd like to sell cheese, meat and potatoes," Charles said. "we'd have to get a truckload of potatoes from Maine, and we're not sure yet how to go about setting it up. But we're learning."

One of the things they learned on Monday, Charles said, was that they could return more to their members than they could earn on the open market. The NFO farmers who sold their meat off the back of the truck on Monday can expect to get back 25- to 27-cents per pound.

Out of the retail price, the group had to pay butchering, packaging and hauling expenses. A few other costs, though, most of them incurred by the members who helped set up the sale, weren't deducted. "At a meeting the other night," Charles said Thursday, "one of the fellows suggested that the people who helped set up the sales should be reimbursed for their expenses. And the suggestion didn't come from one of the people who had helped set it up, it came from one of the members who'd just sent in his cows. We did have some expenses. I know my phone calls alone for this one project came to $73."

Putting on a sale like this is a lot of work, Charles pointed out, and said the NFO doesn't want to get into retailing on a permanent basis. "But we can hold a sale every week or every day of the week if we have to," he said. "We're going to keep on working until we get better prices for farmers."

Charles said NFO membership in Pennsylvania is growing faster than ever before, and he hopes to see bigger increases in the months ahead. "I'm sick and tired of going to meetings and listening to people talk about the farmers' problems," he said. "We want to do something about our problems, and the only way to do that is in the marketplace. You can't do anything for farmers by going to Washington."

While NFO membership is growing, it is still small. Mention NFO to many farmers in Pennsylvania, and they think of milk dumpings, calf slaughters and other acts of militancy. Is this an accurate protrayal of the NFO, we asked Charles. "Those calf slaughters in Iowa were opposed by the NFO leadership," he replied. "Our president, Oren Lee Staley, asked those people not to shoot the calves, but they went ahead anyway. In a national movement like this, you're bound to have some people fly off the handle. But I don't think the whole organization should be condemned for the actions of a few.

"And you've got to remember that the milk dumpings took place in 1962, which is a long time ago. Our membership has changed a lot since then. Some of the people who dumped milk are still members, but they've pretty much dropped into the background. Today, we're trying to work for better

Pigs Are Profitable Meets

Swine producers who want to learn more about raising profitable hogs are invited to two "Pigs Are Profitable" meetings at the Lancaster Farm and Home Center, County Agent Max Smith announced this week.

The first meeting, on Monday, Feb. 17, will start at 7:30 p.m. and will feature Dwight Younkin, livestock extension specialist from Penn State, talking about the methods for calculating feed costs and new returns. He will be followed by extension veterinarian, Dr. Sam Guss, who'll discuss diease control in swine.

The second meeting will be held on Tuesday, Feb. 25, again beginning at 7:30 p.m. The first speaker will be Louis Moore, extension marketing specialist, who will talk about hedging on the futures markets with swine contracts. Then Gerald Bodman, extension agricultural engineer, will discuss odor control and swine waste management.

farm prices. We're not trying to shock people. We're got to get rid of the bad image people have of the NFO."

Max Bennett, an NFO representative from the national office, concurred with Charles' statements about the group's changing tactics. "We just don't do those things anymore," he said. "Those early holding actions were to get attention. We couldn't do any collective bargaining until we made people aware of the fact that we did have the backing of farmers. Now that we're a matured organization, we can bargain in more civilized ways."

According to Bennett, NFO collective bargaining has paid off with long-term contracts with several packing houses in the Midwest. One such contract was inked by Missouri Beef Co. officials after a 52-day hold out by NFO members in 1968. Today, the contract with Missouri Beef has a six-month term and calls for 500 head per day.

Bennett said the NFO objective in getting contracts is to assure farmers of receiving a price that will return the cost of production plus a reasonable profit. "We're not saying the middleman should get less, or the packer should get less, or the consumer should pay more. All we're saying is that the farmer should get more."

Consumers hauled NFO beef away by the box-load, the arm-load and in single bags. Some bought as much as 100 pounds, and one restauranteur was negotiating for 500 pounds of the lean ground meat on Monday in Harrisburg. In all, more than 13,000 pounds of meat was sold from the back of this truck in the East Park Shopping Mall.

Students Active in Chicques Project

(Editor's Note: This article was written by Wendi List, a Manheim Central High School senior. Wendi is an environmental agriculture student participating in an educational program co-ordinated by the Manheim Central Schools in conjunction with the Chiques Creek Watershed Project.)

Three hundred years ago our Pennsylvania soil was a protected land, sheltered from its natural enemies, or at least in a position where it could recover easily from any inflicted damages. It was a virgin land where the fields and the forests provided many a watershed, protecting the land from the annual rains. There was neither flooding nor drought; the soil was fertile and the harvests yielded much.

But then . . . there came a change over the countryside, the change was called development, progress, commercialism. It was rampant throughout the environment, and once begun it was hard to control, for men acted with destruction rather than descretion. Pennsylvania's natural balance was being destroyed.

During the late 1800's and early 1900's there occurred the most extensive slaughter of nature Pennsylvania had ever experienced. It was a time of deterioration and ravishment of the environment. The destruction of woodland was commonplace; very few people even remembered the time when forests once ruled with such uniform authority. The earth was carved into a myriad of building foundations and construction pits, and the land was twisted and molded into a man-made environment.

Wendy List

The rapid development Pennsylvania underwent had its compensations and its consequences. First of all, Pennsylvania became a highly industrialized and wealthy state, which promised a stable future for its settlers. Secondly, the clearance of forests had provided abundant farmland which was the basis for agricultural status. The intentions for an agricultural industry were well-founded, for Pennsylvania had been known to have rich soil, a healthy climate and few natural disasters. Lancaster County became the bed of Pennsylvania's agricultural industry and the newly developed state anticipated the first harvesting year.

The anticipations and expectancy was in vain. The crops yielded little or nothing at all. Floods frequented Lancaster County, washing away precious topsoil, and destroying roads and homes. When it rained everything was flooded, when it did not rain the land was barren. Deposits of silt, the result of erosion, changed the courses of stable water channels causing the uneven flow of water and more flooding. Wastes contaminated the water supply and polluted the streams and lakes. The sediment carried toxic chemicals and plant nutrients into the waters. The wildlife in affected areas was forced to leave natural habitats and seek refuge in unfamiliar environments where many could not survive. Pennsylvania could not adjust to the man-made environment and through much toil and many hardships its settlers were to learn a valuable ecological lesson in the following years.

During an ecology presentation to environment students at Manheim Central High School, Walter Peechatka, director of the State Conservation Commission, outlined some measures necessary in controlling the environment, but preventing the destruction of its natural balance.

The initial concentration on any project or development should be in its planning and awareness of future effects. People should "act with discretion instead of destruction." The Manheim Central Schools are coordinating an educational program with the Chiques Creek Watershed Project. It is a local project which has the support and encouragement from The House of Representatives, the Lancaster and Manheim Chambers of Commerce, the Lancaster County Planning Commission, the Lancaster Soil and Water Conservation District, the Pennsylvania State Soil and Water Conservation Commission, the Lancaster Area Manufacturer's Association and local Manheim Borough associations. The project is proceeding effectively, and it is our objective to inform the public of its progress, for every individual's interest is important.

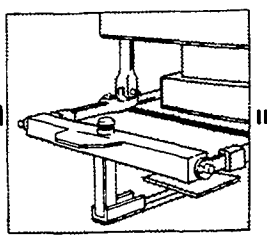
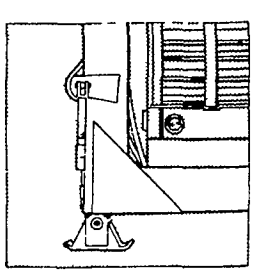
Think of it as a 3-ton grain truck for about half the price.

WINNEBAGO Agri-Trailer TM



3-point tractor hitch.



Two-speed landing gear (jack) provides easy hitching with an empty or loaded trailer.

This versatile trailer teams up with your pickup to help you move grain, livestock and other heavy loads in a hurry.

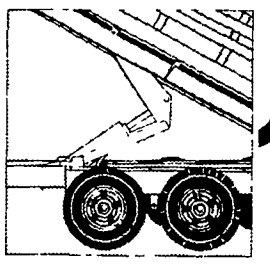
The Winnebago Agri-Trailer can carry as much as a 3-ton truck. It can haul over 7½ tons. Or 285 bushels of grain. It can even operate as a flat bed to carry farm equipment. The Agri-Trailer can handle twice as much as a 4-wheel trailer. And unlike a 4-wheel, it can handle those loads safely at highway speeds.

Standard Features:

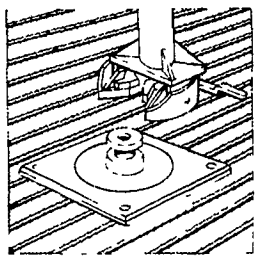
Heavy-duty tubular steel frame • Electric brakes all wheels
Automatic break-away switch • Approved lights and reflectors
Electric Hydraulic Pump (12V) • Electric brake control
42-in. grain box sidewalls (steel, Agri-panel or wood)
8-ft. x 16-ft. grain bed

You might find some of these features on a 3-ton truck. But the truck will cost you about twice as much.

Come In Today And Check An Agri-Trailer Over!



Heavy-duty hydraulic hoist.



Pin & Plate coupler with retractable pin and steel truckbed plate.

Farming Course

Part-time farming is a growing option for rural and semi-rural residents. According to the 1969 Agricultural Census, 25 percent of the farms in Pennsylvania with sales over $2500 are operated by part-time farmers while holding another job. A new correspondence course available from The Pennsylvania State University emphasizes the pros and cons of part-time farming for individual farm families.

Written by John E. Brockett, Jr., Area Farm Management Specialist, the course includes land, labor, management, capital, and market requirements. Lessons on record keeping, tax considerations, budgeting, and insurance needs are geared to the part-time farm business.

Advantages and disadvantages of 18 livestock and 18 crop enterprises are also detailed for the present and future part-time farmer.

To obtain this 10-lesson course, send $5.50 to Part-Time Farmers, Box 5000, University Park, Pa. 16802. Make check or money order payable to Penn State.

Fulton Grange Holds Meeting

Members of the Fulton Grange met recently with Master Donald Trimble presiding.

Under new business it was decided to give a donation to the Meals on Wheels program. Trimble announced the appointment of Mrs. Susan Kauffman as a representative of the Grange to the Community Advisory Committee of Solanco School District.

Lecturer, Joyce Holloway encouraged participation in the State Grange photo, art and craft contests with entries due in September. Valentines made by the Junior Grangers were judged by all the members present.

State Trooper Edward Rowlands showed slides on winter driving followed by a question and answer period.

The Young Married Committee will present the program at the February meeting. A specker will also be present to discuss the Clean Streams Act.

Young Hog Farmer Wins County Award

|Continued From Page 1|

the animals to market age.

Gerald explained that he had become interested in raising hogs as his father had been in the business before. "To get started I borrowed some money from the bank and did some remodeling to the buildings we had."

"Presently we are using a three way cross animal that includes Yorkshire, Duroc and Hampshire breeds," Gerald explained.

Gerald is hoping he will be able to show some of his stock at the area fairs this summer since he had no animals the correct age to show last year.

Raising feeder pigs is only one chore that goes along with the farm work, however, as Gerald also helps his father tend and harvest some 200 acres of corn and 60 acres of grain.

Gerald's father is primarily in the beef fattening enterprise and farming although he does still raise pigs for market.

Along with his work on the farm, Gerald also participates in many of the FFA activities. A Junior at Manheim Central High School, Gerald has served on numerous FFA committees and is presently chairman of the leadership committee which is important to the general overall working of the FFA chapter.

Gerald served the chapter as assistant treasurer and has been on the parliamentary procedure team. Gerald was also on the Dairy judging team that traveled to Penn State for FFA days and has participated on the softball, basketball and volleyball teams sponsored by Manheim FFA.

Gerald explained that he appreciates the things he has learned in FFA and stated that livestock judging practice has been of much use to him.

"From my experience and learning of livestock judging techniques, I've been more concious of good and bad points in animals."

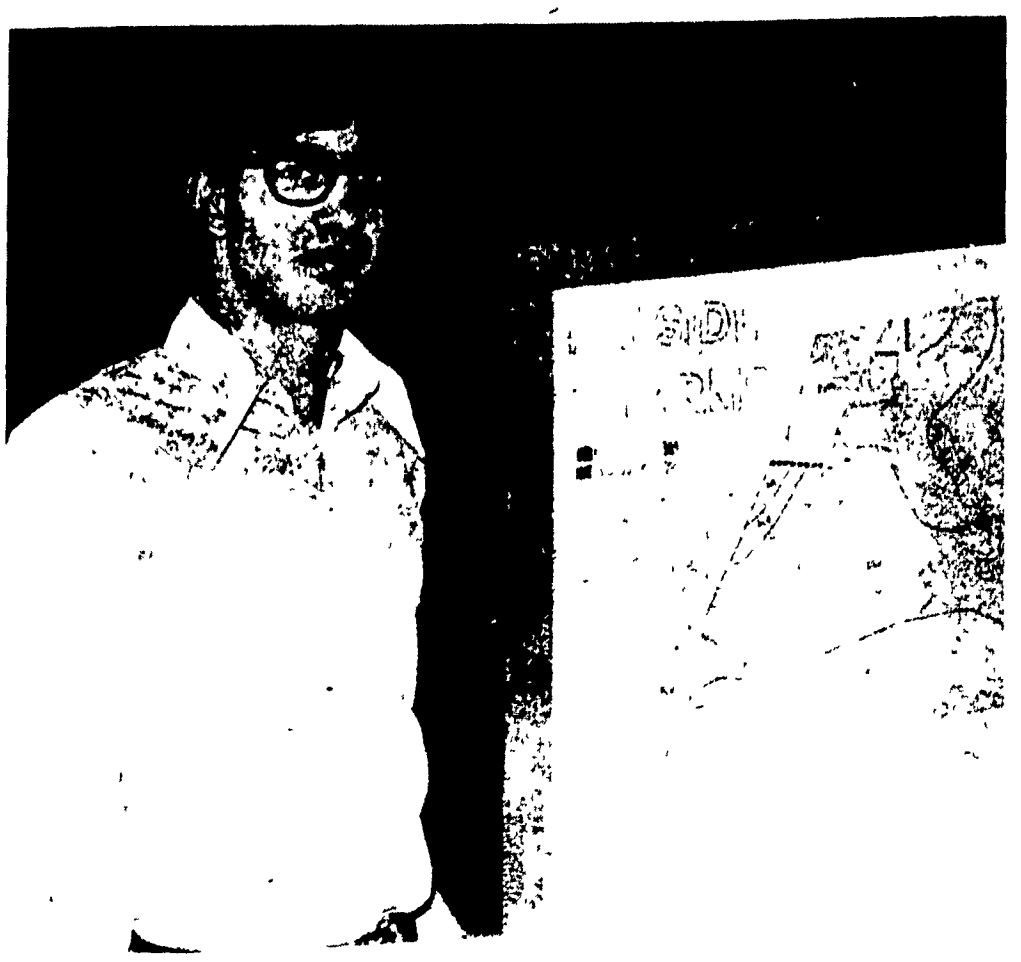
"FFA makes you concious of many aspects of farming that would otherwise go unnoticed."

Along with his FFA work, Gerald is also a member of the Erb's Mennonite Church Youth Group and has served as the chairman of the fund raising committee for the organization.

"Each year we raise sweet corn and have food sales to gain some income," he explained.

Gerald's job has been not only to think of novel money making plans but to make sure they are carried out successfully.

Although Gerald Keller has been mainly involved with hog raising as an FFA project, he has also spent time working in the ag shop at Manheim High School.



One of Gerald's current projects is making a soil survey map of his father's farm.

Gerald is a busy young man who along with his regular school work has taken on much responsibility as a hog farmer. His success however is evident in that he has been elected to receive the young swine breeder's award from the Lancaster County Swine Breeder's Association.

Sweet Bulky Great in Brood Sow Rations, Too!

Sweet Bulky... dairymen have been using it in their milking rations for a long time. The reason? It makes feed taste better, work harder. more digestible and more palatable. Well, sir, **Sweet Bulky** works equally great in brood sow rations, too. When used around farrowing time, it really comes through. Great for eliminating constipation. **Sweet Bulky** contains minerals, vitamins, beet pulp, dehydrated alfalfa meal and molasses. Those ingredients tell a story all their own. **Wayne Sweet Bulky** for hogs.. try it.

Beef Breeding Bull Performance Tests

(Editor's note: This article was prepared by R. L. Kimble, Director of the Pennsylvania Meat Animal Evaluation Center, Pennsylvania Department of Agriculture, and L. L. Wilson, Professor of Animal Science, The Pennsylvania State University.)

Whenever we start talking about performance testing or using performance test records, we hear some of the same comments. I can't afford to put my better animals on test. Or I don't think I can afford to pay that much for bull; and perhaps there are a few cases where this may be true. But, in the majority of cases the progressive beef breeder can't afford not to do these things the way they should be done.

Everything we sell -we think is worth the top dollar, and we want the most for our money when we buy anything. This is just sound business. When it comes time to buy or sell a herd sire, we sometimes loose our sense of direction and far too many times, price is the only thing that seems to matter.

Last year, of the bulls that were sold through the Meat Animal Evalution Center sale, there was a 19 percent difference between bulls with the lowest weight-day of age and those bulls with the highest weight-day. But within those same bulls there was a 37 percent difference in prices paid for the bulls, depending on their weights per day of age.

Let's look at what this means. It simply means that last year each 1 percent change in weight-day of age represented a 2 percent change in the price paid for that same bull. The average price paid last year was $1252-bull, so another way of saying it would be that each 1 percent change in weight-day of age was worth $25. This means that if a bull was 10 percent above or below average, we were talking about $250. Also keep in mind that these are average figures. On the extreme ends there were far greater differences.

For example: in one breed a 1 percent change in weight-day of age represented no economic change and in another breed a 1 percent in weight-day of age meant $92. Another way to look at whether you can afford to put a top bull on test is as follows:

When Average Daily Gain Was: Over 4.0 lb.-day, Average Price Paid by Buyer was: Charolais $2500.; when average daily gain was: 3.6 lb.-day to 4.0 lb.-day, average price paid by buyer was: Charolais $1614., Simmental $1558.; when average daily gain was: 3.0 lb.-day to 3.5 lb.-day, average price paid by buyer was: Angus $1250., Charolais $1013., Simmental $1325.; when average daily gain was: Under 3.0 lb.-day, average price paid by buyer was: Angus 839.

The person who wants to buy a bull has to decide if he can afford to pay more for the higher-performing bulls. There is a pretty logical way to show that calves from these high-performing bulls bring more money. Again let's refer to the bulls from last year's test: Within each breed, 2.6 lb. was the average low weight-day of age for individual bulls within the breeds. This is a difference of 0.5 lb. per day. With this trait being about 40 percent heritable we can only say that 0.20 lb.-day is determined by inheritance and the remainder is due to many other things. We also need to keep in mind that the sire only supplies ½ of the genes, and therefore the 0.20 lb.-day is reduced 0.10 lb.-day which is about the true genetic difference that you could expect to obtain from bulls in the low-performing group compared to bulls from the high-performing group. This doesn't seem like much, but if you multiply 0.10 lb.-day times 240 days you will find an additional 24 lb.-head at weaning. Therefore 50 calves would produce an additional 1200 lbs. at 40 cents-lbs., for a value of $480 for each year the bull is used.

This is a realistic value only for your expected change for pounds of calf weaned. This does not consider the permanent improvement on the female side of a herd, or the more rapid and efficient gains of the calves from weaning to slaughter. This could double the true value of the better herd sire. Naturally, the purebred herds using these high-performing bulls can also expect to have higher performance in their calves, and should be able to sell their bull calves at a better price.

The main point we're trying to make is that if used properly, performance records have to be one of the best tools to use in your breeding program.

We realize that the agricultural economy is not presently conducive to selling, but there is no doubt that the progressive cattle breeder will be able to get more excellent genetic potential, for dollars spent this year, than he has for a long time.

Don't forget Pennsylvania's 2nd Performance Tested Bull Sale on Friday, March 29, 1975 at 12 noon. The sale will be at the Meat Animal Evaluation Center, Penn State University. Charolais bulls will be sold first this year, followed by Angus, Polled Hereford, Hereford, Shorthorn, Simmental, Chianina, Limousin and Maine Anjou. The bulls on test this year have performed very well, and are an exceptional set; ready to go to work to improve Pennsylvania cow herds.

Nutritious Lenten Recipes

Nutritionists at Dairy Council Inc., Southampton, Pa., offer four Lenten recipes that are unusual, tempting and healthful. And they're easy to prepare.

To get away from the ordinary, try these dishes.

Creole Bisque

2 tbs. butter
2 tbs. all-purpose flour
1½ tsp. seasoned salt
1 lb. can stewed tomatoes with onions and peppers
½ lb. sole or haddock fillets cut in 1-inch pieces
½ lb. zucchini, sliced ¼ inch thick
2 cups milk

In a heavy 2-qt. saucepan over low heat, melt butter, stir in flour and salt until mixture is smooth. Stir in tomatoes; add fish and zucchini. Bring to boil; reduce heat, cover and simmer 5-10 minutes or until fish is opaque and zucchini is tender. Stir in milk. Heat to serving temperature.

Scalloped Scallops

¼ cup (½ stick) butter
½ cup all-purpose flour
1 tbs. garlic salad dressing mix
2 cups milk
2 4-oz. cans sliced mushrooms
2 pkgs. (12 oz. each) scallops thawed and well drained
1 tbs. grated lemon peel
1½ cups (6 oz.) shredded Cheddar cheese

In skillet melt butter; stir in flour and dressing mix until thoroughly blended. Remove from heat; stir in milk to blend. Add mushrooms, scallops and lemon peel. Heat to simmer. Cook and stir until mixture is thick and scallops are opaque. Sprinkle on cheese; remove from heat and let stand until cheese is melted. To serve: Place a thick slice of tomato on two small toasted English muffin halves and top with about ¾ cup scallop mixture.

Blue Cheese And Tuna Casserole

¾ cup uncooked rice
2 tbs. butter
2 tbs. flour
2 cups milk
½ cup crumbled blue cheese
6 slices tomato
2 cans (7-oz. each) tuna, drained and flaked
Parsley

Cook rice according to package directions. In a 1½ quart saucepan, melt butter. Blend in flour. Cook over low heat until mixture is smooth. Remove from heat. Stir in milk. Heat to boiling, stirring constantly. Boil and stir one minute. Add cheese and stir until melted. Place rice in buttered 1½ quart casserole. Pour over 1 cup sauce. Top with 6 slices tomato, then tuna. Pour remaining sauce over all. Bake 20 minutes in a 350 degree oven. Remove from oven, garnish with tomato slices and parsley.

Swiss-Baked Potatoes

3 large baking potatoes, peeled
½ stick butter, melted
salt
pepper
4 oz. shredded Swiss cheese
2 tbs. grated Parmesan cheese

Halve potatoes lengthwise, then slice crosswise into ⅛ inch slices. (Do not put potatoes in water after slicing.) Immediately line up in a buttered baking pan (13 x 9 x 2-inch) with slices overlapping, arranging in six serving portions. Pour butter over potatoes. Season with salt and pepper. Bake 20 minutes in a 500 degree oven. Remove from oven; sprinkle with Swiss cheese, then with Parmesan. Bake an additional 5-7 minutes or until cheese is melted and slightly browned.

Mens Category In Sewing Contest

A new category, men's clothing, has been added to the popular sewing contest of the Pennsylvania State Grange, J. Luther Snyder, state master, announced today.

The 1975 contest opened February 1, and the deadline for submitting entries is April 30, according to Mrs. Leroy Hoover, of Roaring Spring, state director of Women's Activities for the Grange.

The contest this year will be open to any Grange member, or Grange-sponsored participant ten years of age or older.

The new class introduced this year - for men's sport coat and pants or suit - will be open to contestants who are 13 years of age or older.

In addition, there will be two classes for women's garments. One will be for contestants 18 years old or older who make garments for the same age group. Another will be for contestants in the 10-17 age bracket making garments for the same age group.

Another class will be for 18-year-old and older contestants making garments for a girl under 18 years of age, or a boy under 13 years.

Winning entries in the state competition will be judged later in the National Grange contest. Top prize will be a one-week Caribbean cruise for two persons.

Storing Bacon

Extension Consumer specialists at The Pennsylvania State University recommend that you buy *only enough bacon for one* week. For peak aroma and flavor, use bacon within five to seven days of home storage. And store it in its original wrapper in the refrigerator. Bacon slices separate easily if you remove the package from the refrigerator about five to ten minutes before using. You can freeze bacon for short periods of time, but for best flavor, long storage in home freezers isn't recommended.

Liquid Feed Supplements

Now Available at

RED ROSE FEED & FARM SUPPLY
Div. of Carnation
27 N. CHURCH ST. QUARRYVILLE, PA
BUCK, PA

Mol-Mix is a high quality liquid feed supplement with a molasses base, which supplies energy, protein, vitamins and trace minerals at low cost. Scientifically-developed to balance grain and roughage intake while stimulating rumen activity. The Mol-Mix formula aids in better feeding efficiency, providing lower cost gains for cattle on range and in the feedlot.

Americans Giving 25% More to CROP Appeal

1974 will be remembered as the year of many things, among them the year that Americans became fully aware of the world hunger crisis.

This increased awareness, and a desire to do something to correct the problem, was reflected in their giving to CROP - the Community Hunger Appeal of Church World Service.

In 1974, people all across America gave $4,029,558 to the CROP Hunger Appeal. This was an increase of 25 percent over 1973. An additional $312,418 was given to purchase blankets for the Church World Service Clothing Appeal, administered by CROP.

1974 witnessed many changes in the world hunger situation. The Sahel of West Africa, drought-ridden for six years, finally received adequate rainfall. CROP-CWS programs in this area, which had been focusing on emergency aid, shifted to long-range development projects. CROP funds are now being used to build a new way of life for thousands of nomads, helping them become settled farmers.

Elsewhere, the situation continued to worsen. The Indian sub-continent, India and Bangladesh, faces its worst famine since the great famine of Bengal in 1943. There are still serious food shortages in some areas of the Sahel and in many nations across Africa, Asia and Latin America.

CROP has already begun to respond to this critical need. In January, 1975, 1,000 metric tons of wheat from CROP and CWS is sailing for India. This is the first of planned multiple shipments to help alleviate the suffering in that nation.

CROP also responded to the many natural disasters that rocked the world in 1974 with clothing, blankets and food. CROP Regional Directors served as resource persons to help several U.S. communities recover after the spring tornadoes that hit the midwestern United States. When Hurricane Fifi cut its deadly swath across Honduras, CROP immediately sent in high-protein food and chocolate milk drink to aid the victims.

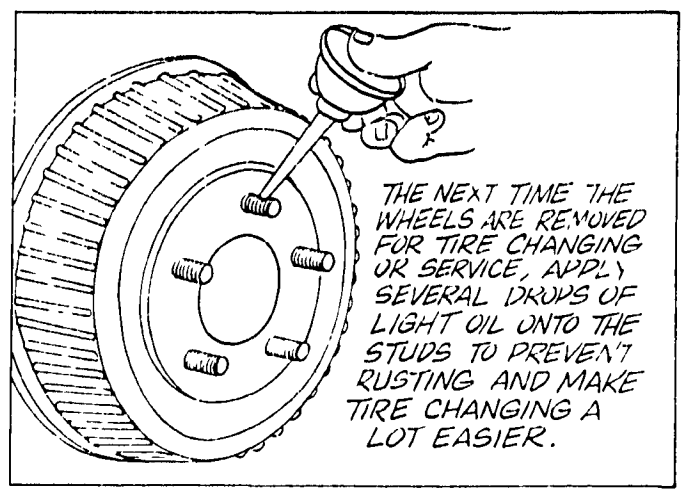
This aid was made possible by the thousands of volunteers who worked on their own, and in conjunction with the 17 CROP Regional Offices, to raise funds to help hungry people. These volunteers canvassed their neighbors, recruited sponsors for walking and fasting and worked in innumerable ways to make this a record year for CROP. In many rural areas, farmers donated grain or profits from "Friendship Acres." Various corporations in the United States contributed food products, seeds, tools and cash worth $204,419.

Again in 1974, the Mid-Atlantic Region led in contributions with a total of $412,877. The highest single state was Kansas with $410,964. Other states that went over $300,000 in donations were Indiana, Illinois, New Jersey and Ohio.

The year 1974 also saw many new ways adopted by CROP volunteers to raise funds. A New Jersey man twice braved a carnival "dunk tank" for CROP. A pastor in Kansas walked backwards the entire length of a CROP Walk For the Hungry. Ralph Waite of "The Waltons" led 1,800 people across Pomona, California, including some crippled youth who literally wore the wheels off their wheelchairs. An 80-year young California lady surprised everyone but herself by completing a 10-mile hunger walk. And in Illinois, a group of melodic CROP workers unlimbered their vocal cords for the first CROP Hymn-a-Thon!

Throughout the year, CROP provided seeds, tools, other self-help materials and food for "food-for-work" projects to over 30 countries on five continents. In addition, blankets and clothing amounting to 2,528,480 pounds were given to CROP to be sent around the world to help disaster victims.

Automobile Service Tips



THE NEXT TIME THE WHEELS ARE REMOVED FOR TIRE CHANGING OR SERVICE, APPLY SEVERAL DROPS OF LIGHT OIL ONTO THE STUDS TO PREVENT RUSTING AND MAKE TIRE CHANGING A LOT EASIER.

Garden Spot Young Farmer Members Receive Honors

The Garden Spot Young Farmers Association held their annual banquet last Friday evening at the Blue Ball Fire Hall. The club honored a number of its members during the meeting. Nathan Stoltzfus, Gap R2, was named the outstanding Garden Spot young farmer for the year, and he received the Carl M. Sauders Memorial Award.

The dairy achievement award went to Clyde W. Martin, East Earl R1. Martin's herd averaged over 16,000 pounds of milk and 600 pounds of fat for the year.

Also recognized were the top producers in three different corn yield competitions. In the grain corn contest, Andrew Stoltzfus, Morgantown R1, was the winner with 205.5 bushels to the acre. Clyde Martin, East Earl R1, was second with 188 bushels, and Larry Weaver, New Holland R1, was third with 182 bushels.

In silage competition, Glenn C. Hershey, New Holland R2, topped the field with 33.3 tons of silage per acre, yielding 15,984 pounds of TDN. Earl Weaver, New Holland R1, came in second with 26.9 tons and 15,064 pounds of TDN, while Walter C. Martin, New Holland R2, finished third with 27.9 tons and 13,950 pounds of TDN.

Nathan Stoltzfus, left, and Clyde Martin received the two top awards last Friday evening at the Garden Spot Young Farmers annual banquet in Blue Ball. Stoltzfus won the Outstanding Garden Spot Young Farmer award, while Martin won his prize for having the group's top dairy herd average.

For the first time this year, the group honored the experiments in their midst by awarding prizes to those who had high yields with new corn varieties, either new in 1974, or first marketed in that year. Glenn D. Hershey, Kinzers R1, took top prize in the new variety contest with a 173.1 bushel per acre yield. Clyde Martin, East Earl R1, had the second best yield of 168.8 bushels, and Ken Skiles, Narvon R2 was third with 167.1 bushels.

Walter C. Martin, New Holland R2, received a special service recognition award. The three special award winners and the top production winners all received a bushel of seed corn along with their prize plaques.

Also honored were five men and one woman for their contributions to the New Holland Young Farmers and area agriculture. Certificates of Appreciation were presented to: Harry Hoffman, New Holland Farmers National Bank; Dr. Luther Natter, assistant superintendent, Eastern Lancaster County School District; N. Alan Bair, associate Lancaster County agent; John S. Yost, a New Holland R2 dairy farmer who is leaving the area to go into mission work; Donald Robinson, Garden Spot vo-ag teacher and Young Farmer advisor, and Mrs. Donald Robinson, his wife.

The 1975 Young Farmer directors are Earl Weaver, Norman Hershey, Robert Book, Eugene Eberly, Kenneth Hershey, John E. Campbell, Larry Weaver, Nelson Martin and Harold Wissler.

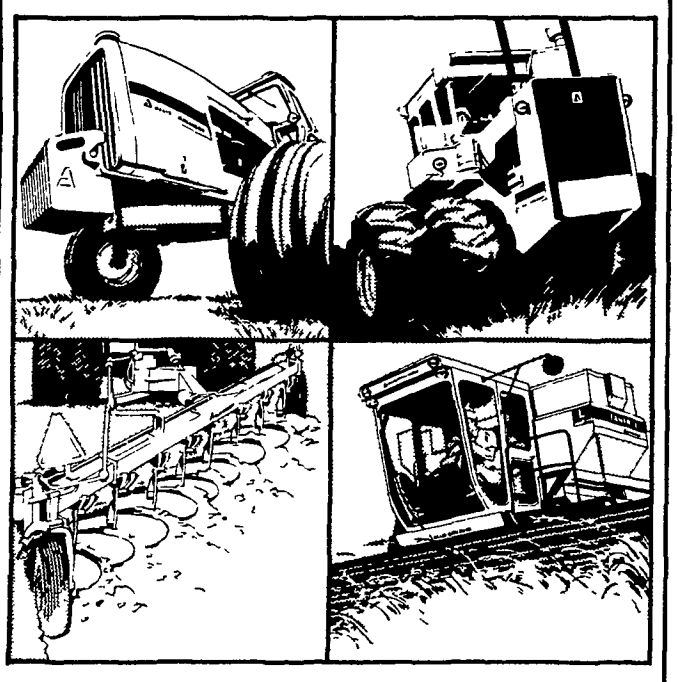
You'll like what you see in the "new" Allis-Chalmers.



Because we've designed new tractors with a lot more horsepower. Two-wheel-drive horsepower up to 180 horses* Four-wheel-drive tractors that crank out 208 tough, dependable horses* And Allis-Chalmers has beefed up the iron, too. With high-speed cultivators bigger discs, more rugged moldboard plows. We made our hitches stronger designed in more trash clearance. And no-one has to tell you about GLEANER Combines with extra harvesting capacity and exclusive features. So stop in at your Allis-Chalmers dealer. Ask him to show you what's new with Allis-Chalmers. It'll open your eyes.

*Manufacturer's maximum observed PTO horsepower at rated engine speed

HOW'S YOUR
Agri-Culture?
EARLY AMERICAN STATESMEN CONTRIBUTED TO OUR PLANT CULTURE BY BRINGING HOME SEEDS FROM THEIR OVERSEAS MISSIONS!
BENJAMIN FRANKLIN INTRODUCED KALE AND RHUBARB FROM SCOTLAND...
AND THOMAS JEFFERSON RISKED THE DEATH PENALTY IN ITALY TO GET UPLAND RICE SEEDS FOR SOUTH CAROLINA.
BECAUSE SEED EXPORTS WERE PROHIBITED BY THE PROVINCIAL GOVERNMENT, JEFFERSON SMUGGLED RICE OUT IN HIS COAT!

Wanted To Buy - Barn with fenced pasture and water, suitable for horses and ponies. Will make limited repairs or alterations. Phone 717-569-5619 after 6 p.m. weekdays, anytime weekends.

Consumers' Corner

Cutting Energy Bill

Electric bills are up 60 percent in many parts of the country The only way to cut such costs is by using less energy

Following are some energy-saving tips to help you cut those home energy costs

—Proper insulation will save up to 50 percent of home heating costs

—Seal off unheated attics during the winter months

—Storm windows help reduce a home's heat loss Clear plastic, taped over windows, will also help

—Caulking and weatherstripping will reduce heat loss by at least 15 percent

—Keep thermostats between 65 and 68 degrees during the day, 60 at night

—Check ductwork periodically

—Don't use hot water needlessly The water heater is the second largest user of energy in the home

—Every time a refrigerator or freezer door is opened, it costs money

I Never Realized Freedom Of Choice Was A Controversial Issue!

Freedom of choice and freedom of speech are the corner stones on which our country was built. There are other freedoms too. Freedom to go and come as you want. Freedom to choose your life style. Freedom to buy what you want from whom you please.

Freedom to succeed or fail in business. Freedom to advertise your products or service in a free competitive market place. Freedom to compete with others.

There are those who would take away these and other freedoms. They say it would be for the "public" good. But, how can it be "good" if your freedom of choice in the market place is taken away by administrative action.

Products and services that are freely advertised offer you the opportunity of making your own individual choice. But, without advertising, how are you going to know the benefits of one product or service over the competition. Think about that.

Think how advertising provides you with freedom of choice. Do you really want this freedom taken away?

Who Needs Advertising? You Do!

DO YOU NEED USED PARTS

MULES & HORSES

I just received several trailer loads of mules and horses, some of the biggest and best you will see in the County.

If you need mules, call the man that knows mules: C. N. Weidman, Mule Salesman.

Melvin Kolb, Inc.
621 Willow Road
Lancaster, PA
Telephone:
393-7459 or
393-6891

For Sale - Registered Standardbred 2 year old filly and yearling brother, slightly small for training, well-bred, priced for quick sale, $400 each. Sire, Handsome Is, $20,000 winnings and brother to Speedy. Dam, ¾ sister to Chuckeen, 1:58. Perkins Cold Spring Farms, Pleasant Mount, Pa., Wayne Co. 717-448-2442.

For Sale - Eligible to register red and white Holstein bull, 2 weeks old, best of Curtiss Breeding. Dam, excellent production of breed. Perkins Cold Spring Farms, Pleasant Mount, Pa., Wayne Co. 717-448-2330.

CHAROLAIS

Calves from the bull you use this year will be sold in 1976. Things should be better then, but good or bad, you will want the most dollars possible per calf. Calves from one of my Performance Tested Purebred Bulls will bring you $25-$50 more per calf. Charolais now more than ever.

JOHN W. STUMP
Clermont Mill Rd.
Street, Maryland 21154
Ph. 301-452-8700

For Sale - Registered Holstein bull, proven sire. Dam, Cold Spring Cam, 22,000 lbs. of milk and 672 lbs. of fat. His calves look terrific. Too closely bred to use in own herd. c-o William Jonas, Perkins Cold Spring Farms, Pleasant Mount, Pa., Wayne Co. 717-448-2330.

Agri-King Congratulates

EARL and BETTY WEIR

COCHRANVILLE, PA

FOR TOP MILK PRODUCTION IN CHESTER CO. ON D.H.I.A. ROLLING HERD AVERAGE FOR 1974
32 COWS 17,684 LBS. MILK 672 LBS. FAT.

Earl and Betty's average in 1972 was 40.6 lbs. of milk per cow per day on all cows. In 1974 their herd average was 50.9 lbs. of milk per cow per day on all cows.

Most farmers don't realize how much 10.3 lbs. of milk is worth. If milk is 8 cents per lb. this amounts to $300.76 per cow per year. Take your number of cows and find out how much an extra 10 lbs. of milk is worth to you.

SERVICEMAN BILL WINDLE, RIGHT, CONGRATULATES EARL AND BETTY ON THEIR 1974 ACHIEVEMENT.

Testimonial

"I was asked what I think of the AGRI-KING feeding program. I don't know exactly what to say — everything is important! You cannot look at any one thing and say that is more important than anything else. Protein, calcium, phosphorus, vitamins and trace minerals at the right levels and percentages are very important to a balanced feeding program. I feel that if a farmer is interested in getting the most out of each acre of ground, each pound of feed and each head of livestock, he will have to test his roughage and fine out what is in that part of his feeding program.

I started on the AGRI-KING feeding program in January 1973 with an average of 14,814 lbs. milk and 583 lbs. fat. We were having breeding problems, severe cases of sore feet and a lot of abortions, and we were unable to find the reason for all these problems. AGRI-KING then checked and found that our hay had a very high level of nitrates, and Micro XX was included in our feeding ration. AGRI-KING is the only one who ever helped us counteract these problems.

By January 1975 our rolling herd average on D.H.I.A. is 18,593 lbs. milk and 693 lbs. fat. We have had 19 straight months in which our milking cows have averaged over 50 lbs. of milk and we didn't have to replace a lot of cows to achieve this record. Eleven of my older cows (with an average of their 5th lactation) averaged 15,135 lbs. milk and 568 lbs. fat in 1973. In 1974 these same cows averaged 19,354 lbs. milk and 706 lbs. fat.

My hope for the future is that we can fine-tune this program and follow it even closer than ever before."

Faye Kreiner

Her Interest in Humanity Took Her to Africa

by Mrs. Charles McSparran Farm Feature Writer

Miss Faye H. Kreiner, 135 S. Charlotte St., Manheim, with 22 years farm background combined with a deep interest in humanity, used her time and talents last summer to accompany 92 head of cattle being flown to Africa, under the sponsorship of Heifer Project International.

Miss Kreiner's trip was sponsored jointly by her church, Chiques Church Of The Brethren, and Heifer Project International. Rev. Becker Ginder is moderator for their church and Faye gives him much credit for her going on the trip. She was the first woman to accompany a shipment of animals for H.P.I. and was the only local person accompanying the cattle. Being a professional photographer, her mission was to take pictures of the heifer project and her church's mission station in Nigeria. She has shown these pictures and told about her trip at least 15 times and she says if any group would like to know more about this or see the pictures she would be happy to show and tell, free of charge.

Clarence Keener Sr., Manheim R.1, has been chairman of the Manheim area heifer project for six years and has done a terrific job in securing animals. Of this 92 head shipment which came from Maryland, Indiana and Ohio as well as Pennsylvania, 39 heifers came from Lancaster County and 10 from Lebanon County. Miss Kreiner's church, with a membership of 460, provided three of the heifers. Marion Lehman, midwest director of H.P.I., whose main office is at Little Rock, Arkansas, was overall chairman of getting the cattle to Harrisburg International Airport. Victor Ziegler, a farmer in Lebanon County and a member of Heidelberg Church Of The Brethren, was responsible for getting the 10 heifers from Lebanon County. The animals from Lancaster and Lebanon Counties were collected at the John Cope farm in Lancaster County. A dedication service, in charge of Rev. Norman L. Harsh, pastor of the East Fairview Church Of The Brethren, and Rev. Isaac S. Kanode, pastor of the Manheim Brethren in Christ Church, was held prior to shipping the heifers to the Pennsylvania Farm Show Building in Harrisburg where they remained three days for inspection.

Faye Kreiner, Manheim, displays African homemade souvenirs she brought from there. She is wearing a silver Maltese pin, holding a gourd dipper with a design burned on it and a little wood carving of a native with water jugs. A couple doilies may be seen. A very large homespun tablecloth provides the setting for two ebony carved busts and an elephant. The picture is made of butterfly wings. The deer picture is etched on metal. Two animal horns are carved to resemble birds. In the front is another wood carving of a native and a lady's suede purse.

They departed August 3rd from the Harrisburg International Airport and arrived 18 hours later at Douala, Cameroon, Africa. The Republic of Cameroon is located just south of Nigeria, on the west coast of Africa. Ten Jersey and ten Holstein bred heifers, a Jersey and a Holstein bull were left at Bamenada, at a co-op farm in Cameroon. Roger Rowe, a retired dairy farmer from Maryland and his wife are stationed at the co-op farm. Their job is to set up a model dairy operation where local farmers will be trained in dairying. Afterward each farmer will receive offspring from the central herd to begin his own herd. Rowes are obligated to stay there one year. H.P.I. took a Surge milking machine along over there and use a generator to run it.

This was the first year they shipped animals to Africa but they think they will do well there because their altitude is 5000 feet, similar to here. They will be used for breeding purposes.

Seventy bred heifers of this shipment were flown to Tanzania, on the east coast of Africa, to supply milk. There are Mennonite and Lutheran missionaries there.

Faye relates that one of the natives said to her "Oh, Oh, Oh my, isn't this exciting, these heifers coming off that plane and walking on our soil is to us like Neil Armstrong walking on the moon was to you people." She said everywhere she went, they all said "Please tell the people we say thanks." The average native over there has never heard of anybody using their own money and giving something away, especially something so expensive as a heifer, to a stranger. She said "I had many chances to witness for the Christian faith when they were sure it was not the government footing the bill. Faye says "First and foremost I am a Christian and as a result am interested an involved in humanity regardless of race or nationality - so that's the special interest in the Heifer Project."

The gift of a farm animal can change a man's life. He gains self-confidence when entrusted with a valuable gift, and hope because he is able to provide a brighter future for his family. He also gains self-respect when he is able to help another family. Everyone who receives an animal from Heifer Project International agrees to pass on the first offspring to someone else in need.

Heifer Project International is a charitable organization that gives farm animals and training in their care to needy people in the U.S.A. and around the world to help them produce food and income for their families.

To give an idea of the magnitude of how these animals multiply and help the people receiving them. One dairy heifer and its offspring in ten years produce a million cups of milk. A beef heifer and its progeny in the same time make 25 tons of steaks and hamburgers. One female pig produces 20 baby pigs a year, which yield 4000 pounds of pork. In many countries the gift of a single Heifer Project pig doubles the animal income of the recipient family.

One baby chick grows up and lays 400 eggs. That's either a lot of eggs for the table or a population explosion in the hen house if they are hatched. Half of all the chickens in Korea today are descended from Heifer Project stock.

Cost-wise - $5. sends a flock of 20 chickens. $50. sends beginning flocks to 10 needy families. $20. sends a pair of rabbits. $100. sends a goat, giving 4 to 5 quarts of milk a day, a sheep or a pig. $500. sends a bred purebred heifer. All Holsteins are from dams that have produced at least the mature equivalent of 14,000 pounds of milk per lactation. Jerseys are from dams that have produced not less than 10,000 pounds of milk per lactation. Even bees have been sent to the needy in 90 countries.

Last fall 100 head of Black Angus cattle were sent to sharecroppers in Mississippi and H.P.I. is also helping stock 3 or 4 Indian reservations with cows and other animals. They employ 25 people to teach the recipients of animals here in the United States and 20 overseas. H.P.I. was started by the Church Of The Brethren in 1944 and since then many other churches, organizations and individuals have entered into it. It is estimated that in these 30 years H.P.I. has donated more than 40,000 animals and a million and a half chickens to people in 90 countries and

[Continued on Page 39]

Shown are part of the 49 head of cattle from Lebanon and Lancaster Counties assembled on the John Cope farm last July which were to be air-lifted to Africa August 3rd.

FFA Week

Feb. 15-22 will mark this year's celebration of National FFA Week. In Pa. alone there are some 213 FFA chapters with over 11,000 youths participating in the program.

The Future Farmers program has changed quite a bit over the past several years, making available many new and exciting projects not only in the agricultural production field but also in the agribusiness and processing industry. Even many chapters involved primarily in the environment are beginning to take form

In recent years, even young ladies have been encouraged to participate in programs involving direct work in agriculture production and processing; many of whom might have been discouraged some years ago.

Most young FFA members I have talked with, agree that FFA is one good way to learn leadership and responsibility which often helps in the later life.

Much credit must be given to these young people and their advisors who each blend to make FFA possible.

Consumer Booklets

As promised last week, I am listing two consumer booklets which I have found to be of use and which may be helpful to you. The first booklet has been on the market although it was recently revised. It is "Food Additives: What They Are-How They Are Used". The booklet is put out by the Manufacturing Chemist Association and explains the uses and purposes of food additives both naturally occurring and those created in the laboratory.

Copies are available free from Consumer Information, Manufacturing Chemists Association, 1825 Connecticut Avenue, N. W., Washington, D. C. 20009

Also the Pa. Bureau of Consumer Protection has recently put out a new booklet covering many aspects of consumer problems from apartment hunting to door-to-door sales. For information write to the Bureau of Consumer Protection, 23 A South Third St, Harrisburg, Pa. 17101

If of interest, both booklets contain a good deal of useful information for all ages.

Her Interest

(Continued from Page 38)

18 states.

Miss Kreiner stayed at the Co-op farm one week before departing for the mission station at Garkiga in Nigeria. Garkiga means bamboo mountain. There are 10 or 12 missionaries at that station. Faye took pictures in Cameroon and Nigeria as well as at Malta where they sent animals last year. She returned home August 23rd.

Faye has been employed by Raybestos, Manhattan, Manheim, now known as R. M. Friction Matereal Company, for 30 years. She works in the office. For many years she worked on a computer. Now she is a supervisor in the Warehouse Iventory Control. The company has 5 divisions at several places. The Manheim branch makes clutch facings, brake lining and industrial linings for off-road machinery.

She is a professional photographer. She takes mostly wedding pictures and children's pictures. She does her own processing of black and white pictures. The wedding albums are all colored photos. She has been doing this for 7 or 8 years. She takes pictures nearly every Saturday. One unusual kind of picture she takes is to superimpose a picture of the bride with her bouquet on a side view of the groom's face. These require a lot of skill and know-how. Faye has a large collection of colored slides and is a member of Wedding Photographers of America.

Faye grew up on her parents 76 acre general farm at Elizabethtown R.3. They had cows, pigs, chickens, and raised tobacco. She milked the cows, worked in the fields and garden and worked in the tobacco. She graduated from Elizabethtown High School. While in school she worked part time in a grocery store. She was in 4-H sewing, garden, Red Rose baby beef and pig clubs, a total of 8 years. She had a grand champion in the pig club.

Since living in Manheim she has been active in Girl Scouts, Junior Achievement and is now enrolled in the next Night Ministry session. The Junior Achievement makes products to sell. Every year three from Raybestos take turns helping Junior Achievement. They have to go one night a week for six months.

Miss Kreiner has been active in her church for a number of years. She sang in the choir and sometimes does substitute teaching in the Sunday School. She does the photo work at church. She takes pictures of special events and takes the babies' pictures.

She has traveled extensively. In 1970 she went on the "People to People" tour, in charge of Enos Heisey. She has been to Europe once and gave 25 travelogues of that trip afterward, to Africa twice, Florida a couple times, New England twice and to the west coast once.

Faye appreciates and enjoys antique furniture and enjoys refinishing furniture. She has an electric organ which she used to play a lot but doesn't have time to play much now. She used to sew a lot, made coats, suits etc. but hasn't had time to sew much the last year or two.

She belongs to American Business Women's Association. She was on jury duty in Lancaster for two weeks recently.

She enjoys cooking outdoors and gives us a recipe for barbecued ribs and one for macaroni salad. The recipe for Koeksisters came from Africa and is most delicious.

Faye's chief hobby is taking colored pictures like this one of Shearer's bridge in Manheim Park.

Koeksisters

4 cups flour
4 teaspoons baking powder
1 teaspoon salt
2 tablespoons butter or margarine
1 tablespoon sugar
2 eggs
water (about 1 cup)

Sieve flour, baking powder and salt together into a large bowl. Rub in the butter or margarine. Add the sugar and moisten with beaten eggs and water. Make a soft dough. Knead very well and leave to rest (overnight, if possible) covered with a damp cloth. Next day, roll out very thinly. Cut into one inch strips wide and three inches long. Cut these in three up to near the end and plait together loosely, then drop into deep hot oil (about three bottles). The temperature is correct when a small piece of dough dropped into center of pan rises immediately to the top again. (Oil must not be too hot).

Drop Koeksisters in and keep turning. When light brown, dip them immediately into ice cold syrup. Drain on a rack over a tray to catch droplets. TIP: Use two spoons - both with holes in them - one for removing from oil and another for the sugar syrup to avoid making the syrup oily.

Syrup:
6 cups sugar
3 cups water

(Dissolve slowly - allow to boil.) Add: ½ teaspoon cream of tartar mixed with 1 teaspoon cold water, some stick cinnamon (3 or 4 pieces) or a few pieces of ginger, or lemon juice and grated rind (to taste).

Boil rapidly for ten minutes, cool and freeze in refrigerator. TIP: In order to keep a supply of chilled syrup, use half of the syrup at a time, keeping the second half in refrigerator, then half way through change over. In this way, the syrup can be used over and over again.

Never store Koeksister in a closed container as this makes them soggy. Oil shoule be strained and stored away for future use in sweet dishes.

Barbecued Ribs

4 lbs. "country" spareribs

Pour over ribs a mixture of:
¼ cup soy sauce
¼ cup cornstarch
3 tablespoons chopped, preserved or candied ginger

Let stand about 30 to 40 minutes, turning frequently.

Place meaty side down on grill. Slowly grill about 3 inches from hot coals. Turn about every 5 minutes, brushing with a mixture of ¾ cup sugar ½ cup pineapple juice and 3 tablespoons vinegar. Grill until meat is a deep brown (about 30 to 40 minutes). Makes 8 servings.

Macaroni Salad

½ lb. macaroni
½ lb. bacon
2 or 3 celery stems
2 or 3 carrots
1 tomato
1 small jar pimento

Cook macaroni, wash and drain. Fry bacon, cool and crumble. Dice celery, tomato and pimento. Shred carrots. Salt and pepper to taste.

Combine all ingredients and mix with bought salad dressing.

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Controlling Personal Finances- Inflation Makes It Difficult

If you've gotten the feeling recently that the family finances were running you - instead of the other way around - you're probably in very good company. Economic circumstances, often beyond individual control, have greatly increased the number of families in financial difficulty.

But, runaway family finances, including a suddenly too heavy debt load, can be brought under control. The American Bankers Association (ABA) recommends three steps in the process:

- A realistic assessment and acknowledgement of the problem.
- A hard look at the family budget and spending pattern.
- Person to person communication with creditors.

As with any problem, acknowledgement of its existence and a look at possible causes must be the first step. A big factor today is inflation. There are many indications that inflation is rising faster than individual earning power. For some Americans, real disposable income may actually be declining each month.

With less money to spend, and more of it going for such essentials as food and shelter, fewer dollars are available for other budget items, including repayment of previously extended loans. Under these conditions loan deliquencies (installments over 30 days late) normally begin to rise, and recent ABA statistics show that they rose sharply in 1974.

Another very real factor in financial difficulties can be (and in some parts of the country has been during this period) unemployment. Whatever the cause, the second step in regaining control is to carefully consider the family budget, assets, and spending pattern.

If records of spending haven't been kept, now is the time to begin. A simple dimestore ledger book, with vertical columns representing income and spending categories (food, clothing, rent, insurance, etc.), and horizontal lines representing pay periods, can show you at a glance your family's yearly spending pattern. Perhaps you'll find that some nonessential categories, such as travel and entertainment, could be temporarily cut back.

The ledger may show you what is already a bone-bare budget. In that case the family assets must be considered. Do you have a vacation home that could be sold? Is your family auto perhaps bigger or more expensive than you really need? Could you make do with a less expensive apartment?

If the best use has been made of available assets, but financial difficulties remain, the final step is to talk frankly with your creditors. Consumers can be, and often are, helped over rough spots through deferred payment arrangements and-or extension of credit terms to bring down monthly payments.

Creditors much prefer to work out an arrangement equitable to all, than to repossess a car or foreclose on a house. A frank explanation of the situation will often be enough to reassure the Lender that you do intend to uphold the loan contract, and could result in a grace period as well as some sound financial counseling.

Stainless Steel Offers Easy Maintenance

Stainless steel is used everywhere: flatware, cookware, furniture, sinks, small and large appliances and decorative accessories, to name a few. It is made by mixing chromium and steel. Additional ingredients may include nickel, molybdenum, titanium, manganese and columbium. Stainless steel can be shiny to the point of mirror-like brightness or it can be a dull satin or brushed-look surface.

Many distinctive qualities make stainless steel ideal for its diverse household and institutional uses. It is strong, resists chipping, denting, cracking, scratching and corroding. The material is durable; does not rust, pit, stain or tarnish. It can be subjected to freezing tempertures and then heated to high temperatures safely.

Another inherent characteristic is its easy cleanability. Stainless steel has no pores or cracks to retain dirt or germs, so it cleans readily with detergent or soap and water solution. Water spotting may be prevented by wiping and drying items with a soft cloth.

For stubborn dirt, such as baked-on food residues, apply a special stainless steel cleaner or household cleanser to a damp sponge or cloth. Then, rub gently in the direction of the polish line or brushed grain. Rubbing in a circular motion may cause scratches.

Farm Women Calendar

Saturday, February 15

Farm Women Society 12 meeting at 1:00 p.m. at the home of Mildred Kindig. Craft program planned.

Farm Women Society 5 of Berks Co. will sponsor a Hoe-Down at the Stouchsburg Fire Hall from 8:00 - 11:00 p.m.

Home on the Range

We hope you had an enjoyable Valentine's Day and prepared something a little special for your family.

In the coming weeks we will be interested in receiving some family-favorite Easter recipes from our readers. Also we are still waiting to receive some recipes used during the Revolutionary War period.

xxx

Citrus fruit is now in good supply and at reasonable prices. Why not try a nutritious and tasty homemade fruit salad combining citrus fruits with other canned fruits such as peaches or berries.

xxx

For those readers who have asked us - a medium sized potato is only 90 calories although the butter and sour cream which often accompanies the baked vegetable increases the total calorie consumption greatly.

xxx

Knackwurst Skillet Supper

6 Knackwurst
1 tablespoon oil
1 medium onion
1 cup barley
4 cups water
1 teaspoon salt
2 chicken bouillion cubes
2 tablespoons brown sugar
¾ cups barbecue sauce
one-third cup green pepper

Score Knackwurst and remove skin. Brown. Remove from skillet. Saute onion. Add barley water and salt with bouillion cubes. Add brown sugar and barbecue sauce and pepper. Cook 20-30 minutes.

Donna Hetzel
Atlanta, Ind.

xxx

Cheese Pastry Buns

3 cups flour
1 cup butter
1 cup sour cream
2 tablespoons sugar

Cut butter and sugar into flour. Mix in sour cream, stir until mixture clings together. Form in ball and chill. Divide in two. On floured surface roll out each to measure 15 x 10. Cut in 6-5 inch squares, fill with the following:

1 pound cottage cheese
2 egg yolks
4 tablespoons cream
3 tablespoon sugar
1 teaspoon vanilla

Mix and divide the filling on each square, fold over each side and sprinkle with sugar and bake on ungreased cookie sheet. 375 degrees for 20 minutes.

Helen B. Huska
Lebanon, N.J.

xxx

1896 Brooklyn Cake

2 cups sugar
two-third cups butter
1½ cup sweet milk
1 cup raisins
5 cups flour
3 teaspoons baking powder

Bake in one pan or 2 small pans. Bake at 350 degrees.

Frances Nolt
East Earl, Pa.

xxx

Old Fashioned Sugar Cookies

1 cup shortening
1½ cups sugar
2 eggs
2 teaspoons vanilla
1 cup sour cream
5 cups flour
2 teaspoons baking powder
1 teaspoon soda
1¼ teaspoon salt

Dissolve soda in sour cream. Drop and press flat with bottom of glass dipped in sugar. Bake at 375 degrees.

Edna Hostetter
Selinsgrove

xxx

Puff Rice Cookies

4 cups puffed rice or puffed wheat cereal
4 tablespoons butter
two-third cups sugar

Melt butter and sugar in saucepan. Cook this mixture over low heat until it begins to turn brown (caramel like). Add cereal and stir well. Remove from heat and pour into buttered pan 9 x 9 inch and let harden.

Cut into squares.

Faye Horst
Ephrata, Pa.

xxx

Raisin Spice Cake

2½ cups flour
1 cup granulated sugar
¾ cup brown sugar
1 teaspoon baking powder
1 teaspoon soda
1 teaspoon salt
1 teaspoon cinnamon
¾ teaspoon allspice
½ teaspoon cloves
½ teaspoon nutmeg
1½ cups buttermilk
½ cup shortening
1 cup raisins
3 eggs

Heat oven to 350 degrees. Grease oblong or 2 - 9 inch pans. Measure all ingredients into large mixer bowl. Blend ½ minute at low speed and then 3 minutes at high speed. Pour into pans and bake oblong 40-45 minutes and layer cakes 35-40 minutes. Cool and frost.

Laura Rohrer
Quarryville, Pa.

xxx

Southern Hush Puppies

1 cup flour
1 cup cornmeal
pinch of salt
pinch of soda
1 egg
buttermilk enough to form into balls

Mix ingredients and mix in 1 small onion chopped. Roll into balls about 1 inch and drop into hot fat. Allow the balls to deep fry until brown and crispy. Drain on paper and serve hot.

Fannie B. Stoltzfus
Quarryville, Pa.

xxx

Homemade Mince Pies

1 quart of raw ground beef
1 cup vinegar
1 cup wine
1 cup cider
1 quart apples (grated)
1 teaspoon salt
1 quart brown sugar
1 cup raisins
1 teaspoon cinnamon
½ teaspoon cloves
¼ teaspoon nutmeg
1 lemon and 1 orange ground

Mix together and use about 3 cups to a pie. Cook about 10 minutes or longer and put in jars and seal or freeze what you don't use. Fill an unbaked pie shell with mincement cover with a top crust and seal edges. Bake at 425 degrees for 15 mintues. Reduce temperature to 375 degrees and continue to bake for 35 minutes. Makes delicious pies.

Junior Cooking Edition

Home on the Range

Our Junior Cooks are still sending in many of their favorite recipes. If you are 15 years-of-age or younger and would like to share your favorite recipe with us - please send it along and we'll send you a brightly decorated potholder.

This week we are featuring some dessert recipes sent in by our Junior readers.

xxx

Grandma Rutt's Lemon Pies

Crust:
1½ quart pie crumbs
1 cup sugar
½ teaspoon soda
enough milk to mix for crust

Mix well then boil:
2 lemons juice and rind
4 cups sugar
8 cups boiling water
2 cups flour
2 cups molasses

Cool then put into pie shell with strips on top. Bake at 325 degrees until lightly brown.

East Earl

xxx

Spanish Rice

2 cups stewed tomatoes or juice
1 cup water
6 tablespoons of raw rice
3 tablespoons chopped onion
2 tablespoons bacon drippings or butter
1 small pepper chopped fine
¾ cup grated cheese
salt to taste

Bake one hour at 350 degrees stirring now and then.

Darla Jean Martin
age 10
Cochranville, Pa.

xxx

Butterscotch Squares

½ cup butter
2 cups brown sugar
2 eggs
2 cups flour
2 teaspoons baking powder
½ teaspoon salt
2 teaspoons vanilla
1 cup chopped nuts (Optional)

Melt butter and blend with sugar, add egg and beat vigorously. Sift flour and measure and add baking powder and salt.

Sift again. Add dry ingredients to eggs and sugar mixture and mix together. Add chopped nuts and vanilla. Spread dough in a greased oblong pan. Bake at 350 degrees for 30 minutes. Cut in squares or bars while warm. Makes 38-40 squares.

Stevens, Pa.

xxx

Jello Whip

1 box jello
1 pint mixed fruit
sugar to taste
1 cup cream or whipped topping

Mix jello according to directions on the box. Let cool until set. Whip cream add sugar to taste. Whip jello and cream, drain fruit and mix together. Chill until firm.

Emaline Martin
age 7
Ephrata, Pa.

xxx

Graham Cracker Pudding

18 graham crackers
¼ cup sugar
½ cup butter

Break or roll graham crackers. Add butter and sugar. Line a dish with these crumbs and save a few for topping.

Custard Filling:
¾ cup milk
3 egg yolks
1 package of lemon or orange jello
½ cup sugar

Bring milk to a boil. Add eggs and sugar. Remove from heat and add jello. Allow to cool and partly set. Fold 3 egg whites that have been beaten stiff and add ½ cup whipped cream. Pour in dish lined with crumbs and sprinkle with remaining crumbs. Chill.

Janet Martin
age 9
Ephrata, Pa.

xxx

Ginger Creams

two-third cup shortening
1¼ cups brown sugar
1 cup molasses
5½ cups flour
1 teaspoon soda
½ teaspoon salt
1 teaspoon ginger
1 teaspoon cinnamon
½ teaspoon cloves
1 cup hot water or coffee
1 cup raisins chopped

Cream shortening and sugar together. Add molasses last and beat thoroughly. Sift flour. Measure and add salt, soda and spices. Sift again and sifted dry ingredients alternately with hot water. Beat only until ingredients are blended together. Fold in chopped raisins and spread dough on greased cookie sheets. Bake at 375 degrees for about 20 minutes. Cut in squares when cooled and spread with favorite frosting. Makes 3½ dozen.

Ida's Notebook

Ida Risser

In the morning, when I arise to find the meadow and yard covered with new fallen snow, it is a temptation to just stay in the house and enjoy its soft whiteness, But no such luck! A second glance tells me the four dark spots floating downstream are really wild ducks and nearby are our big white geeses swimming on the grey water of the Conestoga.

As there is no school, Philip shovels the walks and turns over dirty snow. Then we sweep the porches and make tire tracks on the unbroken smoothness of our lane as we drive the car to a garage. And so begins another busy day as we lost the serenity of those early morning moments.

xxx

The children enjoy winter more than I do and recently arose at 5 a.m. to go ice skating on our ponds before the ice melted in the afternoon. It was dark for skating; even though they tended the calves, heifers, rabbits and dogs before going to the ponds.

Speaking of rabbits, reminds me of an unhappy incident that thurned into a happy one. It seems that Candy's cage was left open and she escaped into the jungle of items stored in the cornbarn. After some tears and many mournful thoughts, a second investigation found the rabbit inside a big tire. And a black rabbit lost at black night isn't easy to find. Thank goodness the children arrived before the cats did.

The other day, Cindy made a big batch of cookies for us. She surprised me by asking to have several piles of spices identified which she had put on the table. But I surprised her more by naming each one quickly and correctly. All these years of cooking taught me something.

Farm Women Societies

Society 6

The February meeting of Farm Women Society 6 was held at the home of Barbara Eberly, with co-hostesses Sadie Wittle and Kathryn Miller.

The meeting opened with group singing of songs sung in the schools many years ago. Mabel Hollinger led devotions by reading a poem about friendship and Psalm 27. Roll call was answered by naming a president of the United States.

During the business meeting the group voted to contribute to the S. June Smith Center and the Cerebral Palsy Foundation. They will also have food stands at several farm or home sales during the spring months.

Announcement was made of the bus trip to the Maple Sugar Festival at Myersdale on March 22, and the Spring Rally at the Hershey Convention Center on April 30.

Barbara Eberly and Anna Geyer gave reports of the State Convention of January 6 and 7. Martha Eshleman had two quizzes. The first was checking whether well-known quotations came from the Bible or another source. The second was unscrambling names of foods. Prizes were given to the winners.

The next meeting will be at the home of Margaret Haines on March 1.

Society 19

Farm Women Society 19 held their February meeting at the East Petersburg Church of the Brethren with Mrs. J. Vernon Newcomer serving as hostess.

Mrs. Elwood Hershey led devotions entitled "God Loveth a Cheerful Giver." Roll call was responded to by naming a favorite hymn. The president, Mrs. A. Ross Weaver, discussed coming events reported to her at the county meeting recently.

A gift of $20.00 was voted for the Lancaster County Mental Health.

Your Basal Metabolic Requirement

How many of us know what our basal metabolic requirement is? How many of us, in fact, know what the phrase means?

Your basal metabolic requirement is simply the number of calories you need to handle those body functions which are involuntary (which you cannot control by inactivity) and to maintain your normal body temperature.

Beyond that you need calories for the things you do in your life that take actual body effort.

I AM INDEBTED today to an excellent new book on nutrition that expresses such requirements in the context of your "caloric checking account." The book, "Let's Talk About Food," was recently published in a third, expanded edition.

Listen to what the author says about basal metabolic requirement, citing a reference woman as a case in point:

"A woman 25 years old, 5 feet 6 inches tall, weighing 133 pounds, has a basal metabolic requirement of about 1,460 calories. Her recommended (total) caloric allowance for moderate activity, however, is 2,320 calories per day.

THE DIFFERENCE - 860 calories - between her basal metabolic requirement and recommended caloric allowance represents the number of calories she must expend for voluntary activities. It is her caloric 'checking account.'

"If all 860 calories are not used during the day's activity, those remaining are transferred from the 'checking account' to a 'savings account' and thus accumulate in the form of fat.

ON THE OTHER HAND, if she overdraws her checking account, the savings are called on and weight loss results. A relatively small savings account in the form of body fat is usually desirable."

It seems to me that the foregoing is an excellent expression of what calories and weight control are all about. You simply must understand it if you are to avoid being fooled by so many of the "trick" diets that are promoted.

Son-in-college!

It's always great to hear from your college enrolled son It usually takes four years and one bank account for him to graduate One nice thing is the letters you get Like the one that reads "Dear Dad-Hope you haven't been ill Send me a check so I'll know you're alright"

ORGANIC LIVING

By

Robert Rodale

HUNGRY WORLD NEEDS ORGANIC GARDENERS

I've said before, and I'll probably say again, that organic gardening is an idea whose time has come.

Pick up a newspaper and somewhere in it you'll find a blaring headline announcing the world's growing shortage of fertilizer.

To an organic gardener, a shortage of chemical fertilizer means about as much as a dropped nickel to a Rockefeller. A true organic gardener wouldn't be caught dead with a bag of the stuff in his garage, let alone on his vegetable patch.

Organic gardeners know how to supply all the plant nutrients crops ever need, just be composting plentiful "waste" materials, such as leaves, grass clippings, garbage and manure. That homemade fertilizer contains nitrogen, phosphorus, potash and important trace minerals. Well-rotted organic material increases the humus content of soil as well — something no chemical fertilizer will ever do.

Despite his thrift and self-sufficiency, the organic gardener has been mocked and scorned for years by those who continued to douse gardens with pounds of chemical fertilizer that hardened and sometimes even poisoned the soil while replenishing only a few key elements.

Now, because of the fertilizer shortage, everyone may suddenly be forced into adopting organic methods, willingly or not. But rather than bemoan that possibility, we should welcome it.

Cost alone makes organic gardening logical for everyone. In addition to the savings on fertilizer, you don't have to buy poisonous insecticides and weed-killers, either. And the food you grow is better. There are no lingering residues of aldrin, dieldrin or the dozens of other poisons that scientists are continually warning us about.

Organic gardeners don't add to the environmental problem — they help solve it.

Probably the most important aspect of this kind of food-raising involves the added measure of security the organic gardener attains. When a family has a stock of frozen, canned and dried home-grown food to eat, unsettling fluctuations in food prices and supply don't pose a threat.

But what about the old argument that you could never feed the world organically?

That's just what's going to have to be done, at least if the predictions of many analysts are correct.

If we run out of petroleum-derived fertilizer, what are people in the world going to do? They just can't call time-out on eating until some new production technique arrives three or four years from now.

The obvious answer is to teach the world about organic gardening — not as far-out an idea as it first seems. In a thought-provoking letter that appeared recently in The New York Times, Elizabeth Rutledge of Warwick, N.Y., wrote that a "large reservoir of talent" in the form of millions of organic gardeners exists across the United States today. That nucleus could teach millions of others the proper technique of organic food-raising.

"As a subsidized agricultural corps, they could spread out to the starving nations and demonstrate how to use the locally available materials to rejuvenate their wretched soils," she wrote.

"At first, the yields might be small, but any yield would be better than no yield. Where is the foundation (or other source) free of influence from commercial interests that could underwrite this self-help program?"

The idea is sound. A world filled with organic gardeners would certainly be a much better place in which to live. And the manufacturers of chemical fertilizers and pesticides could put their managerial talents to use elsewhere in an organically farmed world.

(Editor's Note: the opinions appearing in "Organic Living" are those of its author, Robert Rodale, an independent columnist. Rodale's comments do not necessarily reflect the thinking of the Lancaster Farming editor or anyone else on the Lancaster Farming staff.)

State Lands Set for Low Income Gardens

About 125 acres of state-owned land has been made available for low-income people to participate in Gov. Milton J. Shapp's Anti-Inflation Garden Program, it was announced today by Pennsylvania Agriculture Secretary Jim McHale.

McHale explained that the Department of Welfare, one of several agencies involved in the program with the Department of Agriculture, has made up to 5 acres available at each of its 25 institutions located throughout the state.

The state, said McHale, will plow and prepare the land for prospective vegetable gardners who will then be assigned 30' by 30' plots. These plots will be assigned on a first-come, first-served basis.

McHale said requests for use of the state-owned land should be forwarded to James B. Reagan, project director, Pennsylvania Department of Agriculture, 2301 North Cameron Street, Harrisburg, PA 17120. Deadline for receiving requests is March 1.

The Anti-Inflation Garden Program, announced in December by Gov. Shapp, is an effort to encourage citizens to grow their own garden plots. The state land available for the program is for low-income people who do not have access to plots of their own.

Currently, the Agriculture Department is processing bulk orders for family seed packets of ten varieties. The seeds are being provided by Asgrow Mandeville of Cambridge, N.Y.

Pa. Honey Production Off 34 pct.

Honey production in Pennsylvania dropped 34 percent in 1974, according to the Crop Reporting Service, making it the worst year since 1956.

Although the number of bee colonies was up 5,000 — a rise of more than five percent — the total crop produced only 2.5 million pounds as the average yield per colony dipped from 40 to 25 pounds.

The average price per pound received by beekeepers was up sharply, from 44.3 cents per pound to 59.4 cents. The 34 percent increase in prices, however, did not make up for the huge decline in production which saw the typical apiarist's gross income off up to 12 percent.

U.S. production of honey saw similar trends but on a narrower scale. At 185 million pounds, production was off 22 percent and the average price, 51 cents per pound, was up 15 percent.

The 4.2 million colonies was two percent more than 1973 but the yield per colony dropped from 57.9 pounds to 44.2 pounds.

Pennsylvania ranks 20th in the production of honey.

Newcomer Trains at Sperry

Walter Newcomer, serviceman for Roy A. Brubaker, Lititz, has returned from a week-long training program at the Sperry New Holland Service Training Center at New Holland, Pennsylvania. While at the center he attended sessions in the service and repair of a wide variety of modern farm machinery.

Newcomer, who resides in Mount Joy, has been employed by Roy Brubaker for 1 year. He has an extensive background in farming and a 2 year background in mechanics.

This hydraulic-reset plow has exclusive double-pivot standards that rise as high as 26 inches

Any bottom on a 2500 Power-Reset Plow can clear any rock that passes under the tractor drawbar. Exclusive double-pivot design lets the bottom move back and up past a vertical position—up to 26 inches above the furrow floor as shown here.

Hydraulic power provides the action—and controlled hydraulic return helps the bottom re-enter the ground at nearly the same angle as original entry. An exclusive valve lets you adjust down-pressure to match your field conditions and plowing speed.

Choose these 18-inch plows in 4- to 8-furrow sizes Drop by soon and learn more about light-draft 2500 Power-Reset Plows.

Water Safety

Does your water get cloudy at times? Does it sometimes have a funny taste? Does it smell? If you have answered yes to any of these questions, then you should consider having your water tested. In a water testing program conducted by the Twin Valley FFA in cooperation with the Chester County Health Department last year, it was found that over 50 percent of home water supplies were contaminated with coliform bacteria. These bacteria are found in the digestive tract of warm blooded animals. Therefore finding these bacteria in a water supply indicates that water supply has been contaminated with animal (including human) wastes. Needless to say numerous diseases may be spread by this type of contamination.

According to one American manufacturer of pumps and other water system components, each individual water system should be tested at least once a year. If your water comes from a municipal system, this testing is done regularly, and in most cases this water is protected by chlorination. But when was the last time you had your well or spring water tested? Although you may never have become ill from your water that possibility does exist if it is contaminated with coliform bacteria. Also, as more homes are built around you, each with its own water and sewage system, the chances of contamination are greatly increased. The chances of your water system being contaminated are also affected by the soil type, rock type, and level of the water table.

The FFA Chapter has just completed another testing program for its members and faculty members at TVHS. If you would like to have your water tested, contact either the Chester County Health Department of the FFA Chapter at Twin Valley High School. Chapter officers Melvin Houck and Douglas Yoder have made arrangements for samples to be taken to West Chester each Monday and Wednesday for the next several weeks.

Conference Scheduled

Mutual problems affecting produce growers-packers and buyers will be discussed at the Second Annual Produce Marketing Conference scheduled for Thursday, March 6, in the Agriculture Building, it was announced recently by Secretary Jim McHale.

The conference will be open to all grower-packers and buyers who wish to attend.

"We brought together a number of produce grower-packers and wholesalers buyers on an experimental basis a year ago," McHale said. "The higlight of the event proved to be round-table discussions where growers and buyers freely discussed ideas, marketing problems and gripes. When it was over, both growers and buyers agreed such face-to-face meetings helped create a better understanding, even though all the problems were not resolved."

Both growers and buyers asked that such a get-together be conducted on an annual basis and be thrown open to all growers and buyers who care to attend.

The round-table disussions again will be featured at the 1975 conference. In addition, brief reports will be given on new developments of interest to the produce industry. The meeting will get under way at 10:30 a.m. in Room 309, Agriculture Building, and adjourn at 3:30 p.m. There is no charge.

Lancaster Co. Holstein Assoc. Events Planned

The annual tour sponsored by the county Holstein Association has been set for March 11-12. The Tour Committee has planned a two-day tour to scenic Virginia, where some of the top herds will be visited, including Round Oak Farm, Edge Hill Farms and Rocky Holsteins.

The bus will leave from the Farm and Home Center at 5:30 a.m. Tuesday, March 11. Cost per person is $30.00 and includes transportation and motel expenses. Each person will be responsible for his meals, including a packed lunch to be eaten on the bus the first day.

Reservations for the tour must be made by March 1, with Robert H. Kauffman, Box 655, Elizabethtown RD1, Pa. 17022. Reservations will be returned when bus is full.

The annual barn meetings sponsored by the county Holstein club are scheduled for March 6 and 7. Clarence Stauffer, Genetic Evaluation and Management specialist for the National Holstein Association will be speaker, with both meetings to begin at 7:30 p.m.

The March meeting will be held at the farm of Albert Frey. To get to the Frey farm, get off Route 283 at the Mount Joy - Manheim Exit (not the Mount Joy - 230 exit). Travel east toward Manheim to Erisman Mennonite Church; turn south and it is the second farm on Erisman Road.

The March 7 meeting will be hosted by Ken and Amos Rutt. Traveling south on Route 472, the Rutt farm is located one mile south of Quarryville on the right on Edgefield Road.

FARM CREDIT SERVICE

It wasn't easy to get this far. But where should you go from here?

Twenty years ago it didn't seem possible that you'd achieve as much as you have. But now that you've gotten this far, it's time for new plans. You can't stand still. Yet there was never a greater need for sound judgement, especially where credit is concerned.

That's why you should turn first to Farm Credit Service. Every office is staffed with Farm Credit men who appreciate that your financial needs are special. They know there are no routine answers for your very individual problems. They work with you to provide the money and assistance that will help you farm better. Your loan is tailored to fit your unique needs.

Talk with your Farm Credit man. He knows what it took for you to get this far. . .and what it will take to continue moving ahead.

Pa. Agriculture Summary

On January 1, 1975, Pennsylvania farmers had an inventory of 1,960,000 cattle and calves on 51,000 farms—up 7 percent from 1,832,000 head a year earlier, according to the Crop Reporting Service. Inventory value at $5,292,000 compares with $7,328,000 a year ago, the increased inventory having been more than offset by lower value per head.

The milk cow inventory on 25,500 dairy farms was 686,000 head, up 1 percent from a year ago. Milk replacement heifers 500 pounds and over at 236,000 were up 10 percent.

The inventory of beef cows was 176,000—up 18 percent and beef cow replacement heifers, 500 pounds and over at 49,000 were up 29 percent. Other heifers, 500 pounds and over numbered 77,000, unchanged from a year earlier, while steers 500 pounds and over at 260,000 were off 2 percent.

Bulls, 500 pounds and over at 59,000 were up 28 percent and heifers, steers and bulls under 500 pounds, at 417,000 increased 16 percent. The 1974 Pennsylvania calf crop was 780,000—down 1 percent from the 1973 crop of 790,000.

December 1974 slaughter of meat animals in Pennsylvania was up for all species from a year ago except hogs, according to the Crop Reporting Service. Cattle slaughter increased 17 percent, calf slaughter 34 percent, and sheep and lamb slaughter 1 percent. Hog slaughter 7 percent.

Nationally, production of red meat was 2 percent less than November, but 7 percent more than a year earlier. Beef production increased 8 percent over December 1973, veal production was up 113 percent, pork production up 3 percent, but lamb and mutton production was down 6 percent.

The January 15 Index of Prices Received by Pennsylvania farmers was down 1 percent from mid-December according to the Crop Reporting Service.

Lower prices for food and feed grains, hay, fruit, vegetables and most meat animals more than offset higher prices for lambs, milk cows, turkeys and eggs. The index was 12 percent below a year earlier.

Naionally, the Index of Prices Received by farmers decreased 1½ percent. Contributing most to the decrease since mid-December were lower prices for wheat, soybeans, corn, eggs and flaxseed. Higher prices for lettuce, tomatoes and broilers were partially offsetting. The index was 12 percent below a year earlier.

Sewing Information

When piecing together a pattern, you may have some problems. But if you take advantage of all the information on and in the pattern envelope, you should have less trouble getting the fit and style you want. That's a reminder from Mrs. Ruth Ann Wilson, Extension clothing and textiles specialist at The Pennsylvania State University.

For a general feeling of how the design will look, study the fashion sketch on the front of the envelope. Notice the placement of seams, gathers and darts.

Technical sketches of the back, and sometimes the front, of the garment are also on the pattern envelope. These silhouettes show the garment without any "fashion sketch" distortions.

A garment description on the envelope will give additional information which may not be clear from the sketches, such as position of the waistline and amount of fit in the garment. And it describes whether pant legs are straight, flared or fitted.

Measurements of a garment's width and its lower edge is on the back of the pattern envelope. Finished back length, measured from base of the neck to hemline. also is geven on the envelope. But this does not include hem allowance.

Mrs. Wilson advises you to study this information along with the garment sketches and descriptions, then make comparisons to garments with similar measurements. This will help you estimate the flare in a skirt or pants and the amount of fit allowed through the waist and hips.

When considering garments to be made from knits, the "fabric suggestion" information is especially important. It can help you determine the weight and crispness of fabric which is necessary to give a desired effect.

Then once you've studied the pattern information carefully, either make the garment as the designer intended or redesign it to suit yourself.

For high efficiency at low cost feed your cows

Checkerboard Dairy

You can take advantage of present high milk prices by getting your cows to produce at their bred-in ability — at a low cost. Checkerboard Dairy is the milking ration for the dairyman who wants a highly efficient, yet a low-cost ration for his herd. Checkerboard Dairy has a balance of vitamins, minerals and protein cows need for top performance. And it's a complete milking ration, high in molasses for added palatability and pelleted for easy handling and feeding.

Put your herd on Checkerboard Dairy. See us today — and let Checkerboard Dairy help your cows produce all the milk that's bred into them — and let you take advantage of today's good milk prices.

WOW! Is That True? Yes, It Is True!

84% of all cows in the state of California are milked with Bou-Matic Milkers.

MR. DAIRYMAN:

The dairy farmer in California, due to his breeding and management and his feeding program, has come up with a very high productive herd over the last 8 years.

These rolling herd averages are 54 pounds and up which is nothing uncommon, they were forced to look into better milking systems that would do the job with a minimum of udder irritations such as:

1—Low Vacuum of 10½" to 11½"
2—Not flooding at the teat end
3—No back flushing of the teat canal
4—Proper pulsations per minute
5—Milking all four quarters out together
6—Alternating twin-pulsation for front & rear quarters

7—Inflations which prevent the lines from bulging and climbing
8—Visi-claw for visible milking - plus many more features.

Dari-Kool Bou-Matic MILKERS

Whether you are milking 15 cows or 1500 it will pay you to investigate what Bou-Matic can do for you and your herd. A Dari-Kool Bou-Matic Milking System along with good herd management has proved a winning combination for thousands of dairymen. Ask any Dari-Kool Bou-Matic user.

Thoughts in Passing

FFA WEEK - February 15 - 22
by Ronald Althoff, Agriculture Instructor Solanco High School

One of the best examples of youth in action on the American scene today is the FFA, the national organization for students studying vocational agriculture in the public high schools. It is an organization run by student members under adult guidance.

The FFA was founded nationally in 1928 after several local ideas had become a reality. The idea was to make the instruction in vocational agriculture more interesting by making practical work experience, competitive livestock judging, and agricultural leadership development activities part of the instruction. Right from the beginning the FFA has stressed leadership, cooperation, and citizenship - all vital to success in modern agriculture.

Today the FFA has a membership of over 450,000 with chapters in approximately 8,000 high schools throughout the nation. One of the requirements for membership in the FFA is that a student be enrolled in vocational agriculture. Students may retain their membership until they are 21. At the present time, there are approximately 900 FFA members in Lancaster County.

The activities of the FFA are specifically designed to be a part of the instructional program in vocational agriculture. Through active participation, members learn parliamentary procedure and public speaking abilities, that will enable them to take leadership rules in their school and community.

Each local chapter elects its own officers once a year. The teacher of agriculture serves as the advisor for the local FFA chapter. The county organization selects its officers from the local chapters. Each local chapter elects three delegates as representatives to the county meetings. The county officers and delegates have several activities they are responsible for throughout the year, but the highlights of their years is the annual leadership training conference. Each year the leadership training conference is held at one of the local high schools and the county officers conduct training sessions for the newly elected local officers.

Advancement through the degrees in the organization from the Greenhand through the Chapter Farmer, Red Rose (County) Keystone Farmer, and American Farmer or Agribusinessman is based on achievement in a farming program or agribusiness career and leadership abilities displayed by the member.

At many levels of achievement through the FFA, the student gets some monetary prize as well as the experience he has gained. Funds are provided by over 700 businesses, organizations, and individuals that sponsor these FFA programs through the National FFA Foundations, Inc. The Foundation provides nearly half a million dollars to make the incentive awards available to deserving FFA members in various programs.

This is the week for everyone to recognize our agricultural leaders of tomorrow - today's FFA members.

CHEESE TIP

Airtight and cold are two good pointers to remember when storing cheese. A heavy plastic wrap or container that fits the cheese closely is recommended to prevent cheese from drying out

A Tasty Basic Food

Taste buds are temperamental. Sometimes they crave exotic foods. Sometimes they need plain and simple fare.

On the days when the buds are begging for the basics, there's nothing like a good peanut butter and jelly sandwich.

And, simple though the fare may be, there's still a good deal for the consumer to know when you are picking peanut butter or jelly from among the many competing products.

Of course, peanut butter tastes good, but it's also good for you. It supplies proteins, vitamins, minerals, and fats necessary to a balanced diet. The U. S. Department of Agriculture acknowledges the nutritive value of peanut butter by incorporating it into its food distribution programs.

When USDA buys peanut butter for these programs, it requires that the product be manufactured in a plant operating under one of USDA's inspection programs. Under these programs, inspectors from USDA's Agricultural Marketing Service check the quality of the incoming peanuts, plus the sanitation and operating procedures of the plants. And, most important, they check the quality of the finished product.

Today manufacturers have developed processes that produce a peanut butter that is creamier and smoother than the old-fashioned kind that stuck to the roof of your mouth. But, if you like it the old way, some manufacturers still make it. And there's also the chunky style, with crunchy bits of peanuts mixed into the spread.

Style is important, but so is quality. When USDA inspectors are grading for quality, they check the peanut butter for the aroma of freshly roasted peanuts. They also check the product for spreadability and for color to assure that the peanuts have been roasted to the proper medium brown. Too light or too dark a color may mean that the peanut butter will have a bitter, burned, or raw flavor. Finally, the inspectors taste the peanut butter to determine if the flavor is clean, fresh, and has the right sugar-salt balance.

U.S. Grade A (or U.S. Fancy) peanut butter is the best quality. It is made from U.S. No. 1 shelled peanuts and rates high in color, consistency, absence of defects, flavor, and aroma. Only a few commercial brands of peanut butter currently carry the USDA grade shield. Most plants, however, employ their own quality control personnel to evaluate the product and see to it that it meets their specifications, generally based on the USDA quality grade standards.

When it comes to the jelly part of your sandwich, there's even more to know. First of all, it's good to understand the differences among jelly, jam, preserves, and marmalade. Then you need to know something about quality.

All of these products are made from two basic ingredients — fruit, or fruit juice, and sweeteners. In addition, pectin generally is added to aid in gel formation, and edible food acids are added for flavor balance when natural acids are low.

The manner in which the fruit is prepared and the texture or gel strength of the finished product account for these different kinds of fruit spreads:

Jelly — is made from filtered fruit juice, has a firm gel that holds its shape when turned out of the jar, and is sparkling clear.

Jams or preserves — are made from crushed or whole fruit. Gel texture is not as firm as in jellies and it is not clear. Many preserves consist of whole or large pieces of fruit dispersed in a gel that is thick but not stiff.

Marmalade — is a tender jelly with small pieces of fruit, generally sliced citrus peel, evenly dispersed throughout the gel.

Quality in such a speciality product depends on many complex factors. Processed fruit experts in USDA's Agricultural Marketing Service develop grade standards in cooperation with the preserving industry. The standards — available for fruit jelly, fruit jams or preserves, and orange marmalade provide for two levels of quality.

U.S Grade A (or U S Fancy) and U.S. Grade B (or U.S Choice). These standards are based on factors such as consistency, color, flavor, and degree of freedom from defects.

U.S. Grade B or Choice quality is good on sandwiches or in jelly rolls or omelets. But the top quality, U.S. Grade A or Fancy, is best used for desserts such as cheese cake or ice cream topping, where highest quality and appearance are important.

Some preserving plants use the services of an AMS inspector whenever the plant is in operation. Under this continuous inspection program, the inspector will check the product at all stages of production, and help the plant manager control the quality. The inspector makes sure the equipment is clean, the materials to make the product are wholesome, and the containers are properly filled — all this in addition to certifying quality.

When you see the continuous inspection shield, or more often, the red, white, and blue U.S. Grade A or Fancy shield on a jar of jellies, jams, preserves, or marmalade, you can be sure it was packed under the very thorough continuous inspection of the U.S. Department of Agriculture.

And, no matter what the quality is, jellies, jams or preserves must comply with the Food and Drug Administration rules for composition and ingredients. Among other things, they must be manufactured with no less than 45 parts of fruit or fruit juice to 55 parts of all sweeteners. This ratio was based on trade practices and evidence brought forth at public hearings to establish the Food and Drug standards of identity that define these products. This proportion appears in cookbooks, both current and over 200 years old. If these fruit spreads are sold in interstate commerce and do not meet the composition requirements, they must be labeled "imitation."

So, next time your taste buds are calling for the basics — you can give them quality — not "just" peanut butter and jelly.

New System Uses Cobs to Dry Corn

An experimental system using corn cobs as a heat source to dry seed corn is planned by Pioneer Seed Company, a division of Pioneer Hi-Bred International, Inc. The installation at the company's Marengo, Iowa seed plant will cost an estimated $300,000.

Pioneer is believed to be the first major seed company to attempt using cobs as fuel for drying seed in a system designed to meet environmental quality standards.

Dr. Owen J. Newlin, division president, said that the use of cobs could result in sizeable savings in petroleum-base fuels and natural gas, which are now widely used by the seed industry to dry seed corn. An industrial type furnace will burn cobs from seed ears that have already been dried and shelled.

"This experiment has been under study since it became apparent in 1973 that the nation faces a serious shortage of petroleum and gas," Newlin explained. "We knew that there was enough potential heat energy in cobs to dry at least as much seed as we removed from those cobs. However, at that time, there were no test results nor were there any large furnaces designed to utilize this type of fuel."

The company's engineers and a seed drying consultant worked with an industrial furnace manufacturer in designing the system. The most critical problem was controlling temperatures within a narrow range to preserve germination of seed corn while maximizing drying capacity of the bins.

Robert Dahlberg, production manager, explained that cobs will be fed into the furnace almost immediately after grain is shelled from them. Engineering studies conducted for Pioneer indicate that the pilot project should furnish enough heat to dry 25,000 bushels of ear corn at a time. The unit will generate a maximum heat output of 29 million BTUs per hour, or enough to heat about 250 average size homes in the winter, according to Dahlberg.

Assuming that the dryer bins are in use throughout the five to six-week harvest season, Dahlberg believes about 200,000 gallons of propane could be saved annually by this one unit. The parent corporation's 21 seed corn plants in the U. S. and Canada have a total of 47 dryer units.

The experimental system is expected to be ready for test operation when seed harvest begins this fall. The permits necessary for its construction and operation are being prepared for submittal to the Iowa Department of Environmental Quality.

Legend has it that cats were created by Noah aboard the ark to take care of his rat problem.

Livestock Summary Situation

Consumers continued to indicate their preference for meat last year by spending a record amount of money for a greater volume of meat than in 1973. Red meat consumption in 1974 was the third largest on record at about 187 pounds per person, up more than 11 pounds from 1973. While consumer prices were up 11 percent for all goods and services in 1974, meat prices averaged only 2 percent.

Demand for meat is expected to remain fairly strong in the first half of 1975; constant-dollar incomes still exceed year-earlier levels. Although inflation, recession, and rising unemployment provide little basis for optimism, low consumer spending for such items as homes and automobiles may mean more money available for food, particularly meat. Expansion of food aid programs may help sustain meat purchasing power.

Cattle slaughter and beef production will remain above year-earlier levels this winter as nonfed steers, heifers, and cows continue to offset smaller fed cattle slaughter. Total slaughter, however, may decline seasonally by a small amount from the record kill of over 10 million head during October-December. Fed cattle prices could strengthen later in the winter from January lows of $35-$36 per 100 pounds for Choice steers at Omaha.

By spring, cow slaughter is expected to decline seasonally as pastures green up and cattle are moved back to grass. Choice steer prices could reach the mid-$40's, with cow and feeder cattle prices also improving. Smaller supplies of pork and poultry will also be price-strengthening factors in the spring.

Feeder cattle prices will be sensitive to the demand for feedlot replacement cattle and the price of feed grain. Unless feed grain prices turn much higher by spring, feedlot placements in April-June could increase from a year earlier for the first time in 2 years. Large supplies of feeder cattle, however, will limit price increases for feeder cattle. If the fed market perks up as expected, Choice 600-700 pound feeder cattle at Kansas City could advance to $30-$35 per 100 pounds in the spring from the January level of $25-$27.

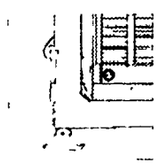
The expanding cattle herd means potential slaughter supplies in the second half of 1975 are large. Forage supplies and the level of feed prices will determine how slaughter of record large cattle supplies is divided between fed and nonfed cattle or calves.

Last fall's reduced corn crop with resultant high feed prices led to large scale liquidation of hog breeding stock. Market hog inventories last December suggest hog slaughter and pork supplies in the first half of 1975 may be the lowest in 9 years. As hog slaughter dips below year-earlier levels, prices will strengthen throughout most of the first half of the year. Barrow and gilt prices are expected to range mostly between $40-$45 through June. Advancing hog prices will be tempered by expected large supplies of beef and demand uncertainty.

Last December hog farmers reported plans for record low sow farrowings during December-May. This planned cut points to a 14-16 percent reduction in hog slaughter for the second half of 1975.

The January 1, 1975 sheep and lamb inventory totaled 14.5 million head, the smallest on record and a decline of 11 percent from a year earlier. A 9 percent drop in breeding ewes means a similiar cut for the 1975 lamb crop. Sheep and lamb slaughter will continue lower through the first half of 1975. Prices will remain strong, but will be influenced by cattle prices. Normal seasonal price trends for slaughter lambs are likely, with prices rising into late winter or early spring, then dropping back and stabilizing later in the year. Lamb prices will likely range between $40-$45 per 100 pounds through the first 6 months of 1975.

BIG TRUCK HAULING WITH YOUR PICKUP AND THE...
WINNEBAGO®
Agri-TrailerT.M.



Two-speed landing gear provides easy hitching.

Easy hook-up with wide-opening jaws of Pin & Plate.

Hitch this versatile trailer to your truck for road travel, switch it to your tractor for field loading. The Winnebago Agri-Trailer can carry as much as a 3-ton truck. It can haul over 7½ tons. Or 285 bushels of grain. Winnebago's 5th wheel design gives unique stability. It turns short, backs up easy, and trails true at highway speeds without fishtailing.

75 Enthusiastic Students Attend Milking School

A two-day milking school held last week at the Lancaster Farm and Home Center was attended by 75 enthusiastic milkers. And, according to N. Alan Bair, the associate county agent who organized the school, there were almost that many applicants who couldn't be accomodated because there just wasn't enough room.

For those who were disappointed at not getting into the school here, Bair pointed out that there will be a three-day milking school at Penn State on April 1-3. The fee for the school will be $10, Bair said, and students must pre-register. More information on the school can be had either from Bair or by contacting: Agricultural Conference Coordinator, 410 J. O. Keller Building, Penn State University, University Park, Pa., 16802.

Asked if there were any plans to conduct another local school, Bair replied that it wasn't likely because of the inherent difficulties in getting the instructors. Most of the milking school instructors are resident faculty members at the university, which means they aren't as available for off-campus instruction as are members of the extension staff.

Bair said he was well-pleased with the response to the school. They covered the subject of milking from inside the udder to inside the bulk tank. Technique, equipment and maintainence, and the physiology of the udder and lactation were all explained.

All the students were interested and enthusiastic, but Bair commented especially on the vo-ag students who were enrolled through their schools.

Silver Spurs Elects Officers

The Silver Spurs 4-H Horse and Pony Club held it's Feb. meeting at the home of Randy and Jim Glick, Bareville. The election of officers for the 1975 year are as follows: Jim Glick, president; Randy Glick, vice president; Sue Baker, secretary; Patty Nauman, senior treasurer; Beth Robbins, junior treasurer and Margaret Keeney, news reporter. County Council representatives selected were: Roberta Stein, Donna Bare, Cherri Gochenaur and Margaret Keeney.

Activities for the new year were discussed. The club will hold its annual Open Horse Show on August 17 at the Lancaster County Riding Club.

Jim and Randy Glick gave a demonstration on English and Western tack and its use. The next meeting will he held at the home of Amy Katz, Lancaster on March 7.

Crop Day

The crop outlook for 1975 will be discussed by Louis Moore, Penn State Marketing Specialist, at the Chester County Crops Day. The public is invited to attend the event at 10:00 A.M., Wednesday, February 19 at the Stone Barn, Rt. 842, about 2 miles west of Unionville. Lunch reservations are $3.00, and may be made by contacting the Extension Office (696-3500) by Friday, February 14.

Penn State agronomist, James Eakin, will inform farmers about the basic recommendations for raising a good crop of soy beans. He will also offer farmers some suggestions on how to cope with the current fertilizer situation.

The pros and cons of different tillage systems will be pointed out by Burton Horne, Penn State Agricultural engineer.

New Holland Baby Beef

The New Holland Baby Beef 4-H club met recently at Victor F. Weavers, Inc. Members opened the meeting with the club pledge followed by reports on their steers. A regular business session was held with leaders giving reports. Lisa and Audrey Hoover closed the meeting with refreshments.

Young Farmers Meet

The Cedar Crest Young Farmers recently held their monthly meeting for February.

Brick and block laying and small engine repairs were the meeting topics presented by Don McNutt. Richard Kreider, president conducted a short business meeting.

The following dates were announced: Month of March - 4 week course on welding. Feb. 25 - Volleyball game with Cedar Crest FFA and March 14 - Family Swim night at the Cedar Crest pool.

Youth Calendar

Wednesday, Feb. 19

Lancaster Co. 4-H Council meeting at the Lancaster Farm and Home Center at 7:30 p.m. Guest will be Lu Oliverda, an exchange student from Brazil.

Wednesday, Feb. 26

3 Milk Co-ops At Joint Meet

A meeting of the collective boards of directors of the three northeast milk cooperatives, NEDCO, Eastern and Dairylea, was held last week at Syracuse, N.Y., under the sponsorship of Empire Cooperative Milk Producers Bargaining Agency, Inc. of which the three cooperatives are equal members.

The meeting was called to explore the present status of legislation and other regulations concerning the bonding provisions for licensed milk dealers and aspects of producer security as it currently exists in New York and Pennsylvania.

Speaking to the subject of bonding legislation and provisions for security of producer payments in Federal Order 2 was a panel of dairy experts from New York and Pennsylvania. Following a welcome by Empire President Leo Briggs, the panel addressed the vital issue of improving the security of producer payments in the New York - New Jersey milkshed.

Making up the panel were John Noakes, Dairylea assistant to the president, and Ted Day, Deputy Commissioner, New York State Department of Agriculture and Markets, who provided background on New York legislation; Dan Williams, legal counsel for Eastern Milk Producers, and Edward Osborne representing James McHale, Pennsylvania Secretary of Agriculture, who discussed security payment enforcement procedures in Pennsylvania; and Thomas Wilson, Federal Market Administrator for Order 2, outlining procedures available under Federal enabling legislation. Panel moderator was Richard Wiles, Counsel to NEDCO and to the Cooperative Marketing Agency.

The over fifty co-op directors in attendance agreed that more definitive work should be undertaken immediately to ascertain whether the agriculturally oriented organizations in the two states could develop and present to the legislature or to the U.S. Department of Agriculture appropriate modifications to improve the security position of producer payments to cooperatives.

Empire, formed in September 1974, by the three northeast co-ops, is an organization through which the cooperatives will seek to bargain with New York State milk processors to maintain a level of milk prices which will permit producers to realize the current costs of production in the sale of their milk.

Directors Meet

The Lancaster County Holstein Association Board of Directors met on February 7th at 8:00 p.m. in the Farm and Home Center.

Among items discussed was the county tour that is being planned. This year's tour will be a two day event to be held on March 11 and 12. The group will be traving to the state of Virginia. Tour chairman, Robert Kauffman said more information will be available soon and it will be included in the County Holstein Club's newsletter that will be going out within the next several weeks.

Barn meetings are scheduled for March 6 and 7 and begin at 7:30 p.m. The March 6th meeting will be held in the southern part of the county on the farm of Amos and Ken Rutt. The meeting on the 7th will be held in the northern section of the county at Albert Fry's farm.

The state calf sale will be held on April 17 at the Farm Show building. It will be followed by a bred heifer, cow and bull sale on the 18th and the state Holstein show on the 19th.

The Field day committee has set a tentative date of August 7th for the event.

The next directors meeting will be on April 4 at 8:00 p.m.

PUBLIC SALE
OF FARM EQUIPMENT, LIVESTOCK, ANTIQUES & HOUSEHOLD ITEMS.
THURSDAY, MARCH 6, 1975
AT 10:00 A.M.

Located 2 miles East of Lancaster of the Old Philadelphia Pike on Horseshoe Road near Conestoga Valley High School, Lancaster County, PA.

LIVESTOCK

39 Head of Holstein dairy cows
25 Head of dairy cows in all stages of lactation
4 Heifers due this spring, 5 yearlings, 4 from 1 to 3 months
1 Registered bull

Wheat Situation Outlook

This year's wheat market is characterized by continued strong export demand and a pullback in domestic demand. It now appears that exports will total 1.1 billion bushels, not much below the record of 1972-73, and year ending stocks are expected to hold near last year's low level. But with a more orderly export scene; the experience last year of operating with minimum stocks, and a free-flowing transportation system, the market has been far less volatile than last year. The reported cancellation in some export sales and the modification of the voluntary export reporting system do not appear to give a reason for changing the export estimate.

Wheat disappearance during July-December 1974 at 942 million bushels was one of the heaviest on record, although restrained compared to last year's torrid rate. A sharp falloff in wheat feeding and a steadier pace of exports both contributed to the decline from last year. As a result, prices paid to farmers were less volatile and the transportation system was under less stress.

But what about the second half of the marketing year? The January 1 stocks of 1.1 billion bushels must satisfy demand until new crop wheat becomes readily available. The export pace is expected to continue heavy. If current projections hold up, roughly half the January 1 stocks should be exported by June 30. The domestic milling industry will grind another fourth. Seed and feed requirements will account for around 5 percent of the total. The remaining 20 percent or 250 million bushels will be this summer's old crop stocks.

Early indications suggest that U.S. wheat farmers may be setting the stage for the third consecutive record wheat harvest. Winter wheat producers, responding to strong prices and an open ended wheat program, increased plantings 6 percent. In just 2 years, acreage is up over a fourth and the largest since 1953. Based on December conditions, which were generally good, a record 1.6 billion bushel winter wheat crop could result.

Last spring, adverse weather and an uncertain price outlook discouraged spring wheat producers from completely fulfilling their planting intentions. This year they appear to be holding down intentions as the January report indicated a slightly smaller spring wheat acreage.

The larger total wheat acreage and average weather could produce a 1975 crop of more than 2 billion bushels. But what about demand? With world grain stocks shrinking further, export demand for wheat in 1975-76 is again expected to be heavy. Tight feed grain supplies this summer could push up wheat feeding and result in total domestic use of over 800 million bushels. But even with a record demand, there would be some stock cushion. Should yields falter again, however, stronger prices and shorter supplies would cut wheat feeding and limit exports.

Hard Red Winter

After a fairly quiet first 6 months, HRW exports will finish with a rush. By this summer over 60 percent of the January 1 stocks of roughly 550 million bushels could be exported. Feed use of HRW has slipped noticeably, but mill grind has picked up in response to the current high spring wheat prices. The strong demand is expected to prevent any rebuilding of HRW stocks this year. Farmers seeded 7 percent more acreage to HRW this past fall and if favorable weather holds, the 1975 crop could be 10 to 15 percent above last year's weather-reduced outturn.

Soft Red Winter

The expansion in the 1974 SRW crop has been matched by a surge in export demand. Exports zoomed, pushing total disappearance for July-December near 200 million bushels, nearly doubled the year-ago level. Demand for January stocks of over 100 million bushels should continue strong during the second half. However, this would still leave stocks by this summer somewhat larger than a year ago's level of 9 million bushels. SRW producers continues to view sheat as a profitable part of their cropping operations as they indicated another sizable acreage increase this past fall. With help from the weather, the 1975 crop could easily top 300 million bushels.

Hard Red Spring

After 2 exceptionally heavy years, domestic milling of HRS has slowed this year. A smaller supply and high prices have reduced the attractiveness of HRS. With higher protein wheats commanding a substantial premium, there has been a tendency to blend less HRS with lower protein winters. Export demand has been good, aided in part by the poor quality crop in Canada, our chief competitor in the world's protein wheat market. HRS wheat stocks this summer could slip some from the 68 million bushels of a year ago. Farmers' planting intentions as of January 1 show slightly less HRS acreage for 1975.

Durum

With durum prices running well over hard wheats, the demand for durum has slowed. The pace of durum exports has slackened and durum mill grind is down this marketing year. Mill grind appears to be running about 10 percent behind the July-December 1973 rate. For the second 6 months, mill grind may continue at that subdued pace. Seed use should expand slightly and additional export sales may push the total for the year to around 35 million bushels. High durum prices, particularly in relation to HRS, were probably the basis for the indicated 10 percent increase in 1975 plantings.

White wheat

Demand for white wheat was strong during the July-December period, but is expected to slow noticeably during the second half. Export demand has been good, with a larger than usual share being eastern white wheat. Outstanding export sales at midyear, at around 45 million bushels, are only around half the hoped-for sales. But a pickup is expected and with normal second half domestic use, stocks this summer should total around 20 million bushels. Dry weather hindered wheat seedings in the Pacific Northwest.

Storing Canned Goods

How you store your home-canned foods will determine their keeping and eating quality, reminds Louise Hamilton, Extension foods and nutrition specialist at The Pennsylvania State University.

Before storing jars, check to see that they are properly sealed. If the jar hasn't sealed properly, recan the vegetables or make the fruits into jams, preserves or butters. Check your stored foods periodically for possible spoilage.

Store home-canned foods in a cool, dry, dark place where they will not freeze. If you have used a two-piece cap, remove the metal band before storing the jar.

Watch out for dampness. Moisture may corrode a metal lid and eventually cause the jar to leak.

Avoid storage areas which might become too warm, such as high cupboards in a kitchen or an unventilated area in a basement. Bacteria which were not destroyed in the canning process may grow in warm temperatures and cause spoilage.

If canned food has been frozen, the food may be "mushy" but it still is safe to eat if the seal is unbroken. If a seal is broken, however, food will spoil unless it is refrigerated and used within a few days after the seal breaks. It also can be recanned or refrozen.

SOUP GARNISH

To give those soups a richer flavor fold cheese cubes or shredded cheddar into the soup just before serving Another way to garnish soup is with sour or whipped cream

FFA'ers Receive Safety Awards

Darrel Stoltzfus, chairman of the Twin Valley Future Farmers of America, safety committee, has announced the winners of the Safety Poster Contest sponsored by the chapter, in cooperation with the principals and art teachers at the four elementary schools in the Twin Valley District. The contest was open to all fifth and sixth grade students in the district. Posters drawn by the students were on the subject of farm, home, or bicycle safety. First place winners in each school will receive $5.00, second place $3.00, and third place $2.00.

Winners are the Twin Valley Elementary Center are: Bruce Stoltzfus, first; Kim Shantz, second; and Roger Harris, third. Honey Brook winners are: first, Lisa Jones; Second, Timmy Carr; and third, Rose Ann Emery. John Coulson captured first; Sara Elliott, second; and Donna Hoffman, third at Caernarvon. Creating the winning posters from Robeson were Caroline Tuman, first; Connie McMullen, second; and Kim Kearney, third.

Darrel stated that the purpose of the Contest is to help make students more aware of safety in their daily lives. Winning posters will be displayed in the various elementary buildings, at the Practical Arts Exposition this spring, and throughout the community this summer.

Tenth grade FFA members served as judges for the contest. The safety contest would like to thank everyone who has helped to make the contest a success.

COW SALE
Thursday, February 20, 1975
12:00

At my Maryland Farm Sale Barn, located ½ mile Northwest of Woodsboro, on Route 550, Frederick County.

100 CHOICE HOLSTEINS 100

Due to not having our January sale, we went all out and purchased 100 head of the best cows and heifers you will ever see in one barn.

We received 1 load of Canadian cows, 1 load of Pennsylvania cows, 2 loads out of New York State and a few cows from other states.

This sale consists of 25 head of extreme top Pure Bred cows that will suit the most particular buyer. We also have 25 fancy Pure Bred first calf heifers, 25 good big fancy Grade cows some milking up to 100 lbs. a day, and 25 first calf grade heifers.

All 100 head just fresh or close to becoming fresh.

Everyone of these cows were just shipped in the last couple of weeks, and all were tested for T.B. and Brucellosis in the past 30 days. Also every cow has been inoculated for shipping fever.

Sincerely,
MELVIN KOLB

AGWAY

like to boost your milk income $60 or more per cow, per year?

16-week study shows a free Agway TDR Profile (a $15 value) can help you do it!

For the study, Agway selected 14 herds totalling 338 Holsteins in the first to 185th day of lactation. Each herd was randomly divided into equal groups: half the herd continued on its regular feeding program, the other half received a ration based on the Agway Total Dairy Ration (TDR) balanced feeding program.

Cows fed under the TDR program increased production by an average equalling 511 pounds per cow per year. And feed efficiency was improved - less grain was fed to produce a pound of milk. In dollars, this means an improved net annual income of $65.70 per cow. Or with 50 cows milking, a greater annual profit of $3,285.

Using the free Agway TDR Profile (and the results of a forage test) you and your Agway Enterprise Salesman can expect to achieve comparable results . . . balancing out your homegrown feedstuffs with Agway Ratio:Right® feeds to assure your cows the right milk-making intake for top production over feed costs.

A free TDR Profile plus Agway Ratio:-Right®feeds can get you back on the road to a profitable operation. Don't wait, call Agway today.
